

Integrated Lab Services Bench

Modular. Adaptable.

Service bench modules connect to distribution panels above the work-bench for maximum flexibility. Service options include fixtures to deliver gas, water, and air utilities to the work space alongside data and electrical outlets on the power bar.

Select a storage option such as the 6" drawer or a lower cabinet for a vacuum pump. Isolate vibration with our caster leveler combo. Upper shelving, work surface material, and coating finishes can be selected based on your lab's aesthetic, function and storage needs.

Combined with other FORMASPACE lab benches, our customizable services bench will complete your connected laboratory solution.

STORAGE

We bring you the industry's most versatile services bench with adjustable cabinetry. Move undermounted storage from left to right as desired.

- cabinets
- drawers
- waste disposal
- vacuum pump cabinets
- custom combos

“Your furniture is as flexible as your service!”

- C. McBride, Ariosa Diagnostics, a Roche Company
