

California CTE College & Career Indicator Dashboard

Thank you!

Thank you for providing the \$900 Million in funding via the CTE Incentive Grant (CTEIG)!

We need your support to provide ongoing, sustainable funding for CTE to meet today's workforce demands.

The **California CTE College & Career Indicator Dashboard** is a collaborative data pilot project sponsored by 11 CTE Pilot Sites, representing the CAROCP Data & Accountability Committee. This CTE Dashboard, showcasing College & Career Indicators from the 2015-16 school year, includes approximately **50,000** students with **62,500** CTE course enrollments, supported by more than **3,000** businesses in the local community.

The data gathered as part of this project aligns with California's **58** Career Pathways, and includes participating employers representing the **15** Industry Sectors as identified by the California Department of Education.

By choosing to allocate further funding for this initiative, you will enable CAROCP to expand the scope of this project through 2018 by A) adding further key data points across a larger number of districts, and B) administering a uniformed Student Follow-Up Survey with consistent data sets to measure objectively the program's success. This increased nuanced data then can be aggregated using the CTE Data Dashboard.

The result will be a more clearly defined pathway from districts and ROPs to employment for an entire generation of California's future workforce.
