

Engineering high performing solutions since 1991

Profitable economic, safety and environmental benefits

**TURNKEY SOLUTIONS 1 STOP SHOPPING**

We design and manufacture the core equipment for CNG Station builders, and we also provide complete solutions from the design all the way to the operation. We produce design development for CNG Stations which result in Civil, Mechanical and Electrical stamped drawings for permitting and construction of the station. The project can then be entirely managed by CNG Source or it can be handled by the client with the contractors of choice.

**COMPRESSION SOLUTIONS**

CNG Source's packaged compression systems are designed with the latest technologies to maximize horsepower. We build all our systems from the ground up to offer the highest quality at the lowest cost. Our systems are also designed to be implemented in every situation. We can adapt to any requirement including emissions, custom controls, noise containment, adverse temperatures, altitude and more.

**SAFETY**

Extensive safety features provide peace of mind and easy inspections. CNG Source systems are equipped with our proprietary controls, remote monitoring, email and SMS alerts, and long-life components. Our builds are accomplished by meeting and most of the time exceeding most code and industry standards for the USA, Mexico and Canada.

**EQUIPMENT MANUFACTURING**

- Compression packages including natural gas drive
- Fast fill dispensers & time fill dispensers
- Intelligent and programmable priority panels
- Control including software design and development
- Remote monitoring systems including email & SMS alerts
- Card readers for fleet management and for payments
- Buffer systems and cascade storage systems

**SUSTAINABLE FUEL SAVINGS MADE SIMPLE**

For the business needing a private, dependable and safe compressed natural gas station requiring little to no attention. Simple and fast to install and easy to operate while highly efficient with the power consumption and the maintenance cost. The FUEL RANGER PRO will satisfy the most demanding budgets by dominating both: The acquisition and the operation cost.

We are proud of our track record in quality and safety of our systems. Since 1991, our CNG Source systems are always designed and built with the latest technologies

**FUEL RANGER PRO**

- UP TO 94cfm / 150m3xhr
- FAST INSTALL IN FEW HOURS
- ECONOMY EFFICIENT 20 to 75hp
- RATED 100% CONTINUOUS DUTY
- DIRECT DRIVE LOW MAINTENANCE
- SCREEN OIL FILTRATION - NO FILTERS
- ULTRA LOW COST OPERATION
- SCALABLE TO DUPLEX
- IMMEDIATELY AVAILABLE

**5 YEARS WARRANTY!**

CNG SOURCE	COMPETITOR
Rated continuous duty	Rated for a maximum 70% duty cycle
Direct drive	Belt drive. Maintenance and parts replacement
Full visual controls and remote reading	Outdated control system
Oil screen . Easy maintenance.	Expensive oil filters requiring replacement
5 years warranty on compressor	1 year warranty in most cases

PERFORMANCE						
MODEL	CS-WP4331		CS-WP4341		CS-WP4351

4500 psi HP	19	23	23	33	43	67
5000 psi cfm	19	29	33	51	59	89
5000 psi HP	17	24	23	33	44	69

STANDARD FEATURES		
Multi-stage oil-lubricated piston compressor	✓ Lubricating oil level alarm	✓
Inter-stage and final after-cooler with oil/water separators	✓ Gas suction connection (flange, pipe)	✓
Over-pressure safety valves at each stage	✓ Flexible drive coupling	✓
Automatic oil/water drain valves	✓ Direct drive Electric Motor	✓
Auto-starting relief integrated with drain system	✓ Resilient AV mounts	✓
Gas over-temperature protective shutdown sensor	✓ Outlet flexible hose with non-return valve	✓
Pressure + temperature indicators and sensor/switch all stages	✓ Flexible oil/water drain hose	✓
Air-blast cooling fan and flywheel	✓ Auto Start-Stop pressure sensor control	✓

OPTIONAL FEATURES	
Crankcase oil sump heater	<input type="checkbox"/>
NEMA7 Starter Panel (on-board starter)	<input type="checkbox"/>
Soft Starter (Remote Starter Only for 75HP)	<input type="checkbox"/>
Acoustic Enclosure Adder	<input type="checkbox"/>
Remote Monitoring (Customer Internet or 4G)	<input type="checkbox"/>
Remote Alerts	<input type="checkbox"/>
Temperature Compensation	<input type="checkbox"/>
Duplex Package with Valve Panel	<input type="checkbox"/>

**CNG SOURCE DISPENSERS**

Fueling Success

For the perfect fill, every time, every vehicle. We manufacture dispensers and fuel-posts with a wide range of options and electronics.

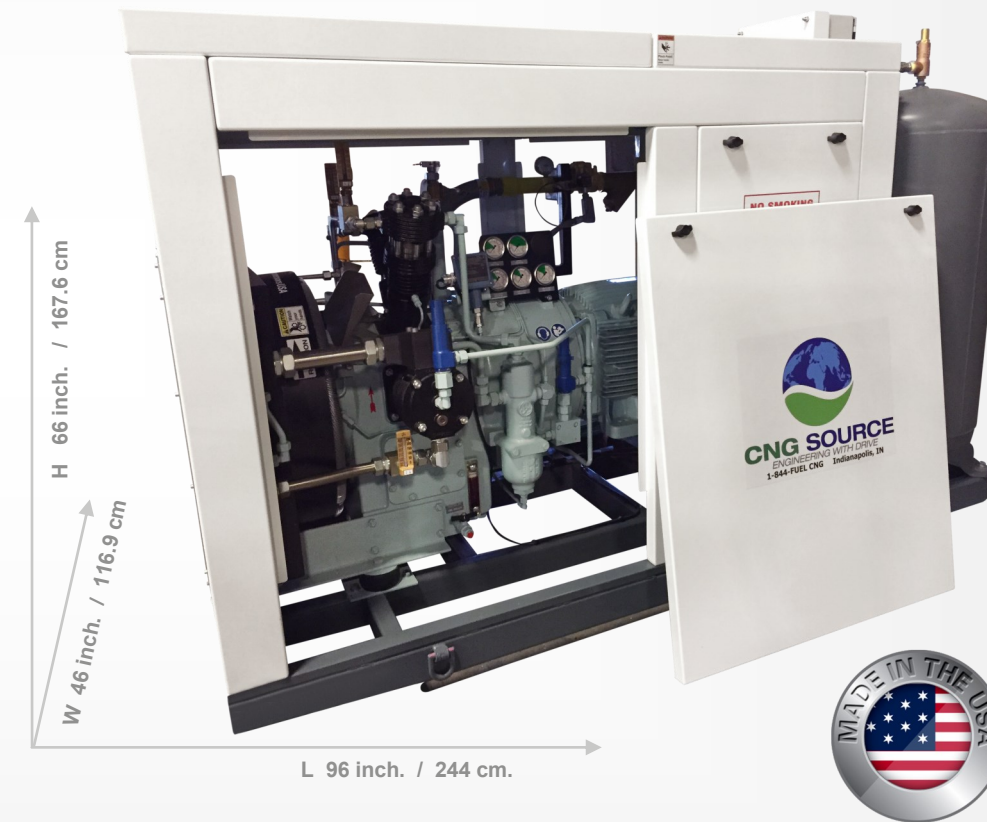

# FUEL RANGER PRO

A highly performing and dependable private station providing an optimal cost of operation and giving you the highest uptime in the market in this category.

## LIMITLESS

- Explosion proof electronics
- Fast fill / Time-fill
- Skid mounted packages
- Dual compressor sets
- Weather and/or sound enclosures
- Remote monitoring
- Multiple options available

## ENGINEERED WITH DRIVE

- Long interval between maintenance stops
- Reduced footprint
- Low compression temperatures
- Ambient temperature up to 120°F (50° Celsius)
- Cooling at each stage
- Condensate separation at each stage
- Direct drive—low maintenance and cost
- Made in the USA
- Completely tested including 3.1 inspection certificate
