Tixeo enhances secure videoconferencing interoperability

Tixeo, the secure videoconferencing editor, adds a new brick to TixeoGateway to serve as a bridge between its secure technology and legacy H.323 / SIP videoconferencing systems.

An easier integration with the H.323 / SIP world

Having a powerful and secure videoconferencing service thanks to the Tixeo client software is fine. Granting these services to the H.323 / SIP users is even better.

This is what the TixeoGateway offers in its latest version: it already allowed an H.323 / SIP system to join a Tixeo meeting through an incoming call; Now, a Tixeo user can as well call any legacy videoconferencing system within a single click, making H.323 / SIP outgoing call.

In addition, the H.239 standard is now supported, letting legacy videoconferencing systems to share an application in a Tixeo meeting.

What about security?

Tixeo provides the only technology ensuring end-to-end encryption in a multipoint video meeting, which is simply not possible on H.323 / SIP systems.

Thanks to this new TixeoGateway and its unique architecture, any workstation can call H.323 / SIP room systems or phones without modifying the enterprise's security policy: network administrators who have once struggled to deploy H.323 / SIP solutions know the nightmare it is and the great amount of open ports it requires. With Tixeo, this difficulty simply does not exist anymore.

Tixeo's technology offers end-to-end encryption up to the TixeoGateway, which is designed to act as a true security portal between the new Tixeo world and the old H.323 / SIP world, protecting against the security flaws of these old protocols.

About Tixeo

Tixeo has been designing secure video conferencing solutions since 2003.

Its solution allows the setup of HD video conferencing from any device with a complete set of collaborative features.

The H.323 / SIP TixeoGateway service is included in the TixeoCloud, optional in other offers. For those wishing to equip new rooms, prefer TixeoRoom to a proprietary solution. It will integrate naturally into the secured infrastructure, while reducing installation and administration costs.

Customers worldwide from SMB to large corporation trust Tixeo: Nexter, DCI, Airbus/EADS, Raytheon, BNP Paribas, Conforama, Sogeti, and many more.

Tixeo is well known for the reliability, security, and ease-of-use of its solutions.
