

iPatientCare Named as a Qualified Registry for MIPS for the year 2017 by CMS

iPatientCare is pleased to announce its selection as a Nationwide CMS Qualified MIPS Registry to report healthcare measures for the year 2017

Woodbridge, NJ, April 05, 2017 — iPatientCare, a pioneer in cloud-based ambulatory EHR and Revenue Cycle Management services, announced that it has been approved as a [Qualified Registry for MIPS](#) by the Centers for Medicare and Medicaid Services (CMS) for Year 2017. Eligible providers will be able to submit their data directly to the CMS with the help of iPatientCare MIPS reporting service.

Physicians can now participate, report MIPS as Individual or as a group, and track how they are meeting a particular quality metric by reporting on MIPS measures. MIPS adjusts payment based on performance in four performance categories that carry different weights that will shift as the program progresses. Payment adjustments, based on the final score, are budget neutral and based on performance from two years prior (e.g., performance in 2017 determines payment adjustments in 2019).

iPatientCare's MIPS Reporting Registry is an easy-to-use solution for seamlessly reporting data for all the MIPS Performance categories – Quality, Improvement Activities and Advancing Care Information. iPatientCare has also introduced its [MIPS Calculator](#) which allows physicians to calculate their MIPS score at any given point in time.

"iPatientCare has been selected as a Qualified Registry for MIPS 2017 by CMS. It is a moment of pride and honor for us to have the opportunity to serve physician community in meeting [MACRA requirements](#). This is the first year for MACRA and doctors really need help in getting ready for the current and upcoming years. We've always been helping our clients to analyze, collect and report data pertaining to the quality of care and are pleased to provide them the option of Registry," said Arnaz Bharucha, Sr. Technology Officer, iPatientCare.

iPatientCare has been qualified PQRS registry since year 2014, helped to many physician practices to increase their revenues while improving patient care. Now with this achievement of being Qualified Registry for MIPS, iPatientCare is looking forward to helping physician community in improving care quality and staying compliant.

About iPatientCare:

iPatientCare, Inc. is a privately held medical informatics company based at Woodbridge, New Jersey. The company's unified product suite includes Electronic Health/Medical Record and integrated Practice Management/Billing System, Patient Portal/PHR, Health Information Exchange (HIE), and Mobile Point-of-Care Solutions for both Ambulatory and Acute/Sub-acute market segments. iPatientCare has been recognized as a preferred MU partner by numerous Regional Extension Centers (REC), hospitals/health systems, and professional academies.

iPatientCare EHR 2014 (2.0) has received 2014 Edition Ambulatory Complete EHR certification by ICSA Labs, an Office of the National Coordinator-Authorized Certification Body (ONC-ACB), in accordance with the applicable eligible professional certification criteria adopted by the Secretary of Health and Human Services (HHS).

Full certification details can be found at [ONC Certified Health IT Product List](#).

The ONC 2014 Edition criteria support both Stage 1 and 2 Meaningful Use measures required to qualify eligible providers and hospitals for funding under the American Recovery and Reinvestment Act (ARRA).
