Atmosera Hires Vice President of Information Security to Bolster Azure Managed Services

Ray Espinoza brings a wealth of experience, acquired working for leading Bay Area companies, to drive Information Security and Compliance services.

News Summary

PORTLAND, Ore. - - April 26, 2017 - - Atmosera, a premier Microsoft Azure solutions provider, today announced that Ray Espinoza has joined the executive team as Vice President of Information Security (InfoSec). Ray is a seasoned security professional having worked for companies including Proofpoint, Cisco Systems, and eBay. He brings extensive experience in security risk management, security incident response, monitoring, and cyber threat. In his role at Atmosera, Ray will help lend credibility in front of customers and auditors as well as oversee the evolution of managed services targeting security and compliance needs.

Atmosera is already a trusted advisor to many customers who demand secure and compliant cloud environments to run their business applications and store data. The team at Atmosera always takes into consideration how best to secure customer environments and how to develop a realistic roadmap. Increasingly many customers are faced with the need to meet regulatory and industry mandates including protecting patient data and financial information. For many, the inability to meet such mandates directly costs them business and the opportunity to win new clients. As more companies look to Microsoft Azure as a key element to their IT strategy, the opportunity to help guide the right secure architecture decisions is accelerating.

"Over the past two years, the number of new Atmosera customers who require secure and compliant environments has grown very quickly," said Jon Thomsen, Atmosera's Chief Executive Officer. "Ray brings a pragmatic and real world experience which will translate to even better services for our customers and deliver on our commitment to stay on top of a dynamic cloud security landscape."

"Security continues to be a confounding topic for many companies who are unsure about transitioning their business to the cloud," said Ray Espinoza, Vice President of Information Security at Atmosera. "Atmosera has established a strong track record at helping companies ensure their clouds are secure and able to withstand attacks and scrutiny. I am delighted to lend my experience and continue to bring to market the services that can help our customers make the most of their cloud and Azure investments."

About Atmosera

Atmosera is a leading Microsoft Azure solutions provider leveraging both the Microsoft Cloud Platform System and Azure. We engineer and operate highly scalable Azure cloud environments that support business critical (they can never go down) applications. We were one of the first Microsoft Cloud Solution Providers (CSPs), we are Cloud OS Network (COSN) certified with a number of large, complex, compliant production environments for customers on Cloud Platform System including Azure Certified Hybrid (ACH) deployments leveraging private and public Azure on a global basis. We know Azure.

With over 20 years of industry experience and real-world best practices, Atmosera is a trusted and secure (HIPAA/HITECH, HITRUST, PCI-DSS V.3, IRS-1075, and SSAE 16) global cloud partner to SaaS providers, financial institutions, healthcare providers, retailers, government agencies, manufacturers, and other industries of commerce.
