

Piaggio EVO

TURBOPROP

ACCESS TO AIRPORTS THROUGHOUT NORTH, CENTRAL,
SOUTH AMERICA AND THE CARIBBEAN

The most aerodynamic airframe brings benefits inside and out

The Piaggio EVO is the fastest twin turboprop in production, reaching speeds of up to 460 mph. New winglets add efficiency by extending the aircraft's range, while new propellers reduce cabin and external noises significantly. Distinctively built for luxurious comfort, it features a well-appointed roomy cabin for a turboprop – 5 feet 9 inches high and 6 feet wide.
