

## **ROCKLER INTRODUCES SPRAYER FEATURING EARLEX HVLP TECHNOLOGY**

MEDINA, MN. (May 11, 2017) — Rockler Woodworking and Hardware has introduced a Finishing Sprayer that features Earlex HVLP (high volume, low pressure) spray technology designed to quickly and efficiently deliver even coats of finish for a wide array of projects.

The addition of Earlex HVLP technology provides great control during application and minimizes overspray to a very small area. The HVLP Finishing Sprayer accommodates many different finishing products, including varnish, lacquer, urethane, latex paint, enamel, stain and water sealant. This allows users to apply base coats of varnish or paint, then come back to apply additional coats and sealants (as long as the machine is cleaned between uses).

"An even coat is one of the most important parts of any finishing project," said Steve Krohmer, Rockler's vice president of product development. "Our new HVLP Finishing Sprayer helps to deliver even coats of many different finishing products quickly and consistently, making light work of virtually any finishing project."

The spray pattern is adjustable between one and twelve inches wide so users can tailor the output to their needs. The flexible hose provides thirteen feet of length to accommodate even large and tall projects, while the one quart paint cup provides plenty of capacity without excessive weight. 1.5mm and 2.5mm needles are included, along with complete instructions for operation and cleaning.

The Rockler HVLP Finishing Sprayer (56405) is priced at \$149.99 and can be purchased at [Rockler.com](http://Rockler.com) or at Rockler Woodworking and Hardware stores nationwide, as well as through the Rockler catalog. For store locations or a free catalog, visit [www.rockler.com](http://www.rockler.com) or call 1-877-ROCKLER.
