SearchBlox

+

Amazon Elasticsearch Service

An Enterprise Search Solution for AWS Cloud

KEY BENEFITS

- Integrated web crawler, file system crawler and connectors for over 75+ datasources
- Index over 40 document formats including PDF, Microsoft Word, Powerpoint and Excel
- Ready-to-use, fully customizable search front-ends including faceted search
- Integrate with LDAP for secured enterprise search
- Web-based Admin console to manage collections(indexes), stopwords and synonyms
- Ability to scale index storage without any downtime
- High availability using multiple search servers and data replicated across two AWS availability zones
- Index data from AWS services like Amazon S3, Amazon Elastic File System and Amazon RDS
- Setup and configure enterprise search applications on the AWS cloud in minutes

SearchBlox is a leading provider of enterprise search, sentiment analysis and text analytics solutions. More than 400 customers in 30 countries now use SearchBlox to power their websites, intranets and custom search applications. With best-in-class text analytics, SearchBlox helps customers simplify the process of analyzing complex data from a multitude of sources, from email and websites to customer surveys and social media.

In 2015 and 2016, SearchBlox won recognition from KMWorld as a trendsetting product, and we are proud to stand out in the marketplace for enterprise search and text analytics.
