## **YAASA STUDIOS LAUNCHES THE INFINITY BLANKET TO PROVIDE COMFORT WITHOUT LIMITS**

### **OVERVIEW**

Yaasa Studios, the comfort and wellness company, announced today the release of **The Infinity Blanket**. A perfect balance of luxury, design, and wellness. It is the first blanket to use the revolutionary, patented fiber textile known as *Celliant*®.

*Celliant*® recycles your body's natural energy (heat) into infrared (IR) light that is then emitted back into your bodies tissues. Over 60% of your consumed energy is lost simply through heat escaping your body. The Yaasa Studios' Infinity Blanket can harness this energy and recycle it back to have a positive effect on your body's overall health.

Infrared is a medically proven vasodilator, which promotes circulation, increases tissue oxygen levels, enhances cell vitality, and regulates body temperature.

### **THE INFINITY BLANKET**

The Infinity Blanket is so comfortable that you will want to have it with you day and night. The benefits of its *Celliant*® technology never goes away. It is durable, machine washable and the clinically tested technology never fades away.

### **YAASA STUDIOS**

At Yaasa Studios, we value innovation, wellness, quality, and sustainability. We create, innovate, and empower our global customers to take control of their own lives; to nurture, transform, and live life to the fullest. This is your life designed.

We are on the cutting edge of supplying products that will benefit everyone at all life stages, and the **Infinity Blanket** is no different. Yaasa Studios... Rest, assured.

Go to Kickstarter today to back this project and get an amazing Early Bird deal. The Infinity project goes live **9am Monday June 12, 2017 Don't miss out!**
