

The H5 eDiscovery Experience

H5 is renowned for high-quality search and technology-assisted review, but we do more so you can do less. Our expert-driven eDiscovery services—standalone or in conjunction with our acclaimed technology-assisted review—come with relationship-focused project support to provide the quality service you expect. New to the mix is H5 Matter IntelligenceSM, a sophisticated H5 dashboard application integrated into Relativity[®], that provides extensive matter visibility to our clients using that platform.

Industry-Leading Technologies for Data Processing and Hosting

No matter what type of litigation or investigation you face, H5 has the expertise and processing power to give you the advantage. Our experts leverage the well-known power and scope of industry-leading eDiscovery technologies such as Nuix, Ipro, and Brainspace and the familiarity of kCura's Relativity[®] to process, analyze, and host data. By using these powerful technologies along with our own proprietary applications, we provide our clients cutting-edge eDiscovery solutions while minimizing the learning curve for counsel.

Relationship-Focused Support

H5 values client relationships and we are committed to providing superior support and a seamless eDiscovery experience. H5 takes a consultative and high touch approach to both project and data management to ensure our clients experience us as an extension of their team—in tune with their needs and intentions and not simply another resource to micromanage. We believe H5 wins when our clients win and we make sure our eDiscovery professionals are equipped with the expertise and focus to provide our clients with the attention they deserve.

Security-Conscious Data Management

We care about the safety of your data. H5's security and information management controls are designed to protect your most sensitive data, whether you're in a highly regulated industry such as healthcare (HIPAA) or have a prevalence of credit card numbers (PCI DSS) or other personally identifiable information (PII). All data is managed in a state-of-the-art SOC2 Certified data center. (Specifications available on request.)

Intelligent Data Reduction

Why incur the incremental costs of processing, hosting and reviewing irrelevant or clearly non-responsive data? H5 can help you reduce costs down the line with intelligent data reduction, a fast, defensible, identification of non-relevant data using our proprietary tools and methods, executed by experts and informed by counsel.

An Enhanced Relativity® Experience with H5 Matter IntelligenceSM

More knowledge. More control.

H5 clients can enhance their eDiscovery management experience in Relativity with H5 Matter Intelligence (H5MI), a robust dashboard application that provides real-time access to the billing and project analytics needed to make well-informed matter management decisions by and across matters.

How H5MI helps inform good decision-making.

Billing and pricing transparency

- Real-time and historical visibility into matter billing activity, with hosting and user fees gathered from Relativity
- Pricing transparency, with access to current and historical pricing models for your matters
- Estimated month-end billing projections by and across matters based on calculated run rate

Automated notification and reporting system

- Automated real-time email and in-app notification options for actionable information about matter activity
- Configurable notification options alert you to specific budgeting or billing thresholds, billable changes to users and workspaces, and workspace inactivity
- Detailed, customized reports sent to your inbox at a frequency you determine, including pre-built billing summary reports, aggregated project-to-date billing and data progression details, user/workspace inactivity reports and reviewer progress information

Intelligent resource management

- Reviewer progress reporting on demand or available on a customizable schedule
- Graphical representation, by customizable date range, of review progress by review group, batch set or field, with the ability to monitor reviewer progress
- Easy access to reviewed documents in Relativity via interactive report links

H5 Managed eDiscovery Solutions

Managed Infrastructure-as-a-Service (IaaS)

Control. Expertise. Infrastructure.

H5's Managed IaaS provides law firms and their clients the ability to manage hosting, processing, technology-assisted review and analytics without the burden of capital expenditure and resource drain. Pay only for the infrastructure you use. Whether it's Relativity®, Ipro, or another eDiscovery solution, the dollars saved can be applied elsewhere to benefit your client and enhance your firm's competitive advantage.

KEY BENEFITS

H5 Matter IntelligenceSM

Use H5 Matter Intelligence for sophisticated and efficient case management, collaboration, and resource analytics for your Relativity®-hosted matters.

Control

Maintain hands-on control of secure eDiscovery processing, hosting, analytics, and assisted review applications at a significant cost savings.

Security

Data stored in a SOC2 Certified, state-of-the-art data center, compliant with the highest industry standards for data security.

Cost-Reduction

Constrained and predictable costs, with no hardware investments, annual licensing requirements or software maintenance fees.

Scalability

Infrastructure that can grow as and when necessary to scale to the litigation support load.

Expertise

24x7 technical and project support by an expert team that includes certified administrators and product specialists.

Overflow Support

On demand overflow support by seasoned experts when the demands of your practice exceed your team's immediate capacity.

Unified Matter Repository (UMR)

Spend once, reap (& repeat) the benefits.

H5's Unified Matter Repository uses the most advanced eDiscovery technology to deliver a fully managed centralized repository for litigation data. Aggregated data collections minimize—or even eliminate—the need to re-collect, process and host copies of the same documents over again. Privilege and confidentiality calls can live with the document, saving time and repetitive costs as subsequent matters arise.

KEY BENEFITS

Simplicity

An H5-hosted repository where eDiscovery experts manage, administrate, and organize your project data and work product across matters.

Cost-Reduction

Savings throughout the eDiscovery lifecycle through single-instanced, hosted content enabling reuse of data and attorney work product across all of your matters.

Speed

A jumpstart on each new matter with immediate access to existing project data while any supplemental data is collected.

Intelligent Retention

Accumulated, historical information about document source details and matter history informs retention decisions for diligent data management.

DATA SECURITY

Data security is paramount at H5. We're proud to offer our clients the full scope of security with data managed within our SOC2 Certified, state-of-the-art Digital Realty data center.

(Data center specs available on request.)
