

Connect with your existing EBANQ Online Banking System

Although the EBANQ® web banking system already looks and works great on all mobile devices, our apps bring mobile banking security and user friendliness to the next level. Our Mobile Apps for iOS® and Android® allow your customers to access all the services available in the web interface without the need to use a web browser:

- View balances and statements
- Transfer funds between accounts
- Transfer funds to other users
- Transfer funds from accounts to cards
- Order outgoing bank transfers
- Send and receive secure messages
- View and update their user profile

The Mobile Apps connect to your existing EBANQ® web banking system. We customize the apps for you, with your own logo, colors and app icon. We even obtain the required approvals and put your customized app on the Apple® App Store® and Google Play® for you. Bringing your mobile banking services to the next level has never been easier! The apps are available separately or as a bundle for both iOS and Android at reduced pricing.
