PRT Releases New Maintenance Logbook for Sewer Rehab Cutters.

For a limited time, rehab cutter operators can request a free copy to help manage their day-to-day maintenance activities.

RANDOLPH, NJ—July 20, 2017—Pipeline Renewal Technologies is offering a free, printed, full-color logbook to encourage and simplify routine maintenance for sewer rehab cutters. It features checklists and sign-offs for the start and end of each working day, as well as weekly maintenance steps. Without regular preventative maintenance, cutters are costlier to operate and less reliable, leading to equipment failures, downtime and diminished profit.

“We wanted to give rehab crews an easy way to keep their equipment running well,” says Sean Lipscomb, Strategic Account Manager for Pipeline Renewal Technologies. “This logbook makes maintaining a record of preventative maintenance and equipment condition simple. Crews can ensure that all routine maintenance is performed regularly and track wear and tear over time.”

“After experiencing high demand for our Inspection Crawler Maintenance Logbook, we realized that rehab crews could use a logbook for their cutters, too,” says Jake Wells, Director of Marketing for EnviroSight. “This new logbook is specifically geared towards mainline sewer rehabilitation cutters, providing a concise record of maintenance.” The logbook is suitable for all brands of rehab cutters.

This logbook is published as part of Pipeline Renewal Technologies’ continuing efforts to create and share reference material that benefits professionals in the underground pipeline rehabilitation industry. To request a complimentary copy, visit: <http://inbound.envirosight.com/rehab-cutter-maintenance-logbook>

About Pipeline Renewal Technologies.

Pipeline Renewal Technologies is an EnviroSight company focused exclusively on the pipeline rehabilitation market. The company offers technologies for no-dig structural lateral connection; drain and mainline cutting; durable point repair; video drain flushing; and process measurement. A strong emphasis on support makes Pipeline Renewal Technologies the partner of choice for municipal contractors looking to gain a competitive edge with innovative technologies. Pipeline Renewal Technologies is a member of NASTT and NASSCO.
