

Captain Eco 10-Stage Shower Filter Installation Guide

1. Dismantle Existing Shower Head

Simply remove your shower head either by hand or by using a wrench. Our shower filter is universal & you can use it on all types of shower heads.

2. Run Through Water & Wash The Shower Filter

Clean the filter to remove any dirt or carbon dust that may be inside the filter cartridge, you may have to run water (preferably hot water) for more than 5 minutes until you see no more black water.

3. Use Teflon Tape to Seal The Connections

Use Teflon tape to securely seal all the connections in between shower filter & shower head to prevent any possible leakage.

4. Change The Existing Filter Cartridge

Dismantle the existing shower filter from the shower head, remove the old cartridge & replace it with the new one. Repeat all steps above.

Replacing the Filter Cartridge

Order new cartridge from our website www.CaptainEco.com/Shop Now dismantle the shower filter, open & get rid of the old cartridge, replace it with the new one, close the filter again, seal it with Teflon tape, run through water for 5-10 minutes to clean all the carbon dust.

NOTE: It's always better to wash the cartridge with hot water to remove any carbon dust that cause the initial water to be black. This again, may take 5-10 minutes.

NOTE: The side with big holes should face the inflow of the shower filter. Each filter will last for 6-8 months (10,000 to 12,000 Gallons of water)

In Case of Any Problems

Product damaged during shipment

If for any reason you receive a broken product, please feel free to send us an email to Support@captaineco.com and we will try our best to send you a new product as fast as possible.

Water leakage while taking a shower

Always use the Teflon tape we provide in the package to tightly seal all the connections between the shower filter & shower head. Do not try to over tighten the shower filter as it may leads to a future leakage. If you still see the leakage from your shower filter, calmly open the filter and check that all the rubber washers are in place.

If you experience any problems or have any questions, please contact our responsive and knowledgeable Customer Care team before returning the product. We are here to help!

High-Performance shower filter by Captain Eco

Contamination in Tap Water	Health Damage	Method of Removal/Filtration
Rust	Cause of liver cancer	PP cotton filter
Turbidities, Microorganisms, Sediment	Cause of various diseases	PP cotton filter
Chlorine	Cause of rectal cancer, colon cancer and bladder cancer	Granulated Activated Carbon, KDF
Odour	Bad smell in water	Granulated Activated Carbon
Impurities and Volatile Organic Chemicals (VOC)	Cause of various diseases	Granulated Activated Carbon / Ceramic Balls
THMs: Total Trihalomethanes	Cause of kidney cancer and birth defects.	Granulated Activated Carbon
Bacterial	Cause of various diseases	KDF / Calcium Sulphite
Algae	Cause of various diseases	KDF / Calcium Sulphite
Lead (Heavy Metal)	A poisonous metal that can damage nervous connections and cause blood and brain disorders	KDF / Calcium Sulphite
Mercury (Heavy Metal)	A cumulative heavy metal poison	KDF / Calcium Sulphite

KDF Process Media (KDF-55) are high-purity, granulated copper and zinc-based alloys for removing chlorine and water-soluble heavy metals, and it controls scale, bacteria and algae, even in hot water.

Calcium Sulphite is 100 times more effective than activated carbon at removing chlorine and heavy metals such as lead, mercury, cadmium and aluminium.

Granulated Activated Carbon X2 (GAC) filters are most effective at removing radioactive iodine 131, chlorine, trihalomethanes (THMs), chemicals, impurities and Volatile Organic Chemicals (VOCs) from the water.

Biocera Ceramic Balls are manufactured from a variety of functional ceramic materials. They adsorb impurities and harmful heavy metals and help human metabolism and natural healing.

MAIFAN Ceramic Balls is great to eliminate peculiar smell of the water. They mineralize water and add useful minerals to the shower water, which is great for digestion and aging prevention.

Activated polypropylene (PP) cotton X2 filter contains a unique structure and its surface is 3-8 times bigger than ordinary filters, which is effective at removing turbidities, sediment, rusts and microorganisms from water.
