

INTELLI-SITE-LITE

BY OSSI

Access Control Engine

Intelli-Site-Lite is designed exclusively for electronic access control (EAC). Start with basic EAC functionality and scale up to Intelli-site to satisfy more complex integration needs.

Intelli-Site-Lite Benefits

Unlimited reader and door scalability

Activity View displaying live

Web client for access by any device

Templates for easy user assignment

Built-in scheduled events module

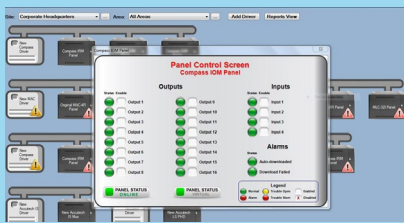

Scalable to fully integrated system

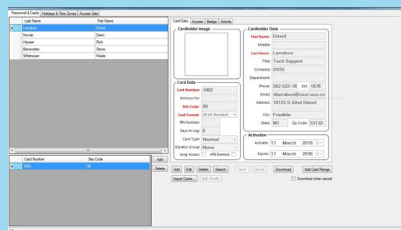

Built-in reports for quick reference

CONTROL ACCESS

Pop-up screens allow the operator to enable, disable, and activate any point in the system quickly and efficiently. Use our Hardware Management View to easily see a graphical representation of the systems health along with helpful configuration notifications.

MANAGE USERS

Our Access Management View provides configuration of holidays, time zones, access levels, access assignment, and user information. Also, you can easily manage users by reviewing card activity, documentation, reports, and much more.

SCALE UP

Using an Intelli-Site system offers your organization flexibility. Start with 2 doors, and continually add to your solution as you need. Even if you grow into a fully integrated solution that includes intercom, CCTV, alarms, and more, with thousands of doors at hundreds of locations—Intelli-Site will continue to grow with you.

OSSI builds Compass and MAC boards, giving us direct control over product quality and manufacturing speed. Both boards also operate on same software—Intelli-Site—which means you are able to upgrade from the Compass Board to a MAC if your needs change.

COMPASS BOARD

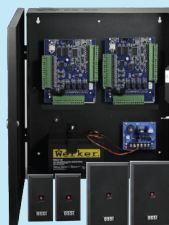

Compass boards offer a low cost building blocks approach with nearly limitless capabilities.

2 Door Compass System:
\$2,999 (MSRP)

2 doors, 2 readers, 50 cards and software

4 Door Compass System:
\$4,399 (MSRP)

4 doors, 4 readers 50 cards and software

MAC BOARD

MAC series controllers use LonTalk protocol which is highly flexible and scalable communications topology.

2 Door Mac System:
\$4,360 (MSRP)

2 doors, 2 readers, 50 cards and software

INTELLI-SITE

BY OSSI

Customizable Rules and Alerting Engine

Intelli-Site is a next-generation software that takes multiple building systems and aggregates them to deliver one control and alerting center. It's a powerful solution that's surprisingly easy to use. Thanks to an intuitive graphical user interface, OSSI is the most customizable, user-friendly system in the industry.

Intelli-Site Benefits

Easy to Program

Flexible & Scalable

User definable screens/floor plans

Partner Compatible

Web client for access by any device

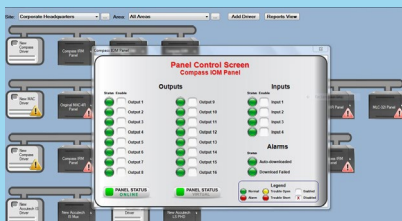

Built-in scheduled events module

A or B

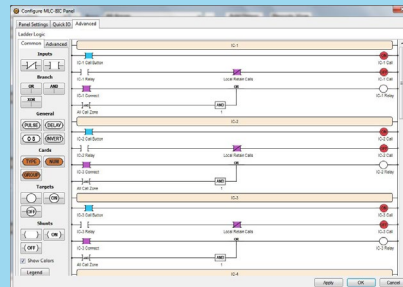

Two to four state input supervision

HARDWARE MANAGEMENT VIEW

Understand the health of your system and interact with any point of hardware on your system at all times. If the server goes down your hardware will run without interruption (multi-server redundancy available as option).

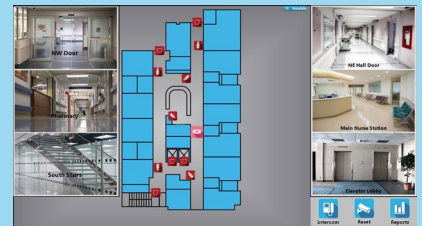

LADDER LOGIC PROGRAMMING

Ladder Logic Programming allows:

- Quick config drag n' drop editor
- Preprogrammed defaults for doors
- Building Automation
- Man traps

COMPREHENSIVE INTEGRATIONS

Software directly interfaces with:

- CCTV/DVR
- Intercom
- Perimeter
- Fire
- PLC
- Nurse Call
- Infant protection/wander management
