ULTRALOX
INTERLOCKING™

FEATURES AND BENEFITS

- Aluminum Railings are assembled in a matter of minutes.
- Assemble the railings in your shop – eliminating expensive field labor.
- No more wasting parts – Build what you need, when you need it.
- Need 100 panels fabricated at 54 ½"? No problem!
- Cut your horizontal H-Channels to the proper size and only use the number of pickets you need for the panel.
- Save Parts, Save Cost, Win More Jobs.
- Stair Panels: Convert machine within 10-minutes to build stairs. And Yes, the stairs can be racked to accommodate any stair angle.
- Fencing and fence panels can be built up to 48" with our UltraLox 8' model and 72" Tall with our 12' model.
- Custom heights from 24" to 72" can be built with the UltraLox InterLocking Machines.

THE LOX8

The UltraLox™ LOX8 was designed for the high volume deck builder/lumberyard & property management companies looking to reduce labor cost, control lead times and drastically increase profit.

- Up to 48" Tall Fencing
- Up to 8' Deck Panel
- 6' Stair Panel
- Machine Size: 9' x 4' Footprint, 11' Tall

THE LOX12

The UltraLox™ LOX12 industrial interlocking machine is capable of assembling aluminum railings and fence panels, 24"-72" in height and up to 12 feet in length. The LOX12 model delivers high production deck railing panels as well as custom height railing/fence and stair panels.

- 72" Tall Fence Panels
- Two 6' Deck Panels at Once
- 8' Stair Panels
- Machine Size: 13' x 4' Footprint, 13'6" Tall

GAME-CHANGING POWDER-COATED ALUMINUM RAILINGS

UltraLox™ is a truly unique machine that fabricates aluminum, powder-coated railing components on demand. The interlocking components are then easily and quickly installed on the jobsite without any special tools, mechanical fasteners or welding. The structural, ICC-ES AC273-tested products can be produced in a variety of profiles, configurations and colors, providing exceptional aesthetics as well as industry-leading strength and reliability.

- Prefabricated panels for fast & efficient installation
- Durable Aluminum Construction / Architectural Grade Powder Coating
- Fast and efficient installation
- Hidden Fastener System / No welds or rivets
- Engineered & Approved to ICC-ES AC273 commercial and residential building codes
