

## Altizon partners with SNic, a leading channel partner for Siemens & Rockwell Automation products

Altizon, the Industrial IoT company recently announced its partnership with SNic Solutions (SNic), a leading Industrial Engineering and Management Consulting firm. SNic is also the official channel partner & system integrator of Rockwell Automation and Siemens in India, America and South-East Asia. SNic, during the course of its industrial automation work provides installation and integration services for 'Preactor', a leading advanced planning and scheduling (APS) software by Siemens and 'Arena', a popular simulation software by Rockwell Automation.

The partnership with Altizon will involve integration of Datonis, the IIoT platform by Altizon with both Preactor and Arena softwares. These integrations will enable Manufacturing enterprises to feed with real time relevant machine data out of the box from Datonis IoT platform into these leading software packages. Such a link will enhance production planning, simulation modelling and predictive analytics for the shop floor data.

"Manufacturing industry is undergoing huge transformation where real time data is the backbone for all the manufacturing systems. We sensed this need and were looking for a robust, easy to use, and quick integrability IoT platform to connect to these systems," said Nikhil Joshi, Founder & Director, SNic. "With Datonis on our side, we can now offer an end-to-end solution to help our manufacturing & healthcare customers get Industry 4.0 ready and achieve digital transformation".

"Altizon is delighted to join forces with SNic Solutions to provide a joint value offering to the industrial customers. The easy integration of Datonis with globally adopted products like Preactor and Arena is a step towards our vision of delivering rapid value to enterprises by converging IT and OT. The partnership with SNic is a key step towards realizing this vision." said Vinay Nathan, CEO, Altizon.
