Registration Open for iPatientCare National User Conference (NUCON) 2017 that offers boundless learning opportunity to all its members; to be held on October 6th – 7th

Bringing the whole iPatientCare family to connect and communicate – 'NUCON 2017' is a great User Engagement Event for Education, Exhibition and Entertainment.

Woodbridge, NJ, September 19, 2017 — iPatientCare, a pioneer in cloud-based **ambulatory EHR** and **Revenue Cycle Management services**, announced today its much awaited gala annual event, National User Conference (NUCON) 2017, which will be held on October 6th and 7th, 2017 at Hotel Hilton Midtown, New York City. iPatientCare's annual user conferences involve national participation of iPatientCare users and channel partners, focus on education/exhibition/entertainment and generate great excitement and applaud for the series of presentations involving sneak preview of the future product releases and fun events engaging the entire iPatientCare community.

Every year through NUCON, iPatientCare offers a great learning opportunity to all its members to stay up-to-date on the future industry trends as well as latest and upcoming enhancements in iPatientCare product suite. **NUCON** serves as a great platform that brings iPatientCare channel partners, end users, certified professionals, business partners, and entire iPatientCare family together for plenty of networking, learning from each other, and having fun over foods, drinks and outings as a group.

Kedar Mehta, CTO, iPatientCare described the event as the greatest customer engagement event of the iPatientCare and said enthusiastically, "We are delighted to have this opportunity to connect with iPatientCare community yet once again. As healthcare reforms push providers towards pay-for-performance and value-based payments, we enhance our technology, tools, and methodologies to help physicians, office managers, and their patients to enjoy the benefits of the reforms. I look forward to delivering the Keynote session with Udayan Mandavia, CEO/President, iPatientCare. The keynote session would brief all the attendees with the iPatientCare's upcoming technologies and what would be the user experience in 2018."

"We have been conducting this annual gala event for past seven years and the overwhelming success of these NUCONs has encouraged us to come up with one more conference filled with lot of excitement and enjoyment for the community we serve. The NUCON attendees would have an opportunity to cruise over the Hudson, overlooking Manhattan skyline and spend time with their family and network with their peers on the rooftop bar and lounge of the Spirit Cruise." said Rajesh Mandaviya and Parth Vyas, Coordinators, NUCON 2017 Organizing Committee.

The **NUCON 2017** promises to provide a great platform for learning and networking along with extraordinary entertainment.

About iPatientCare:

iPatientCare, Inc. is a privately held medical informatics company based at Woodbridge, New Jersey. The company's unified product suite includes ONC Certified Electronic Health/Medical Record and integrated **Practice Management/Billing System**, Patient Portal/PHR, Health Information Exchange (HIE), and Mobile Point-of-Care Solutions for both Ambulatory and Acute/Sub-acute market segments. iPatientCare has been recognized as a preferred MU partner by numerous Regional Extension Centers (REC), hospitals/health systems, and professional academies.

iPatientCare is also known for its Revenue Cycle Enhancement services that provides domestically outsourced, technology-enabled and process-driven solutions for patient access, denials management, HIM/billing and coding, and Lean Six Sigma dashboard-based analytics. iPatientCare has been helping healthcare providers to dramatically reduce A/R days and improve collection rates, reduce billing costs, eliminates the burden of repeatable, high volume work with their internal teams, and plug gaps in staffing and internal bandwidth.
