

9/25/17 – For Immediate Release

Press Release:

Beckwood to Showcase LAUNCH™ Virtual Press Designer at FABTECH® 2017

St. Louis, MO – Beckwood Press Company, a leading manufacturer of custom hydraulic presses and automation systems and the Triform line of precision forming equipment, will be showcasing their latest innovation in press design at FABTECH® 2017. Visitors to booth A5448 will not only learn tips to increase productivity and eliminate unplanned downtime, they will also be able to quickly develop concept drawings on-site to share with internal stakeholders.

This year’s booth theme, “Imagine the Possibilities” showcases LAUNCH™, Beckwood’s exclusive virtual press design technology. Via a user-friendly interface, visitors can work with Beckwood’s Solutions Team to input a variety of variables (bed size, tonnage, speed, heat parameters, etc.) and generate a preliminary sketch of their new machinery in real-time on the show floor.

“This technology is changing the way our customers approach capital equipment purchases,” said Jeffrey Debus, President of Beckwood Press Company. “In a few short minutes, users are able to define many process variables and watch their ideas come to life. Having a concrete solution to their toughest manufacturing challenges gives customers peace-of-mind and greatly expedites purchasing decisions.”

Beckwood’s Solutions Team has more than 100 years combined experience developing robust machinery and engineering competitive advantages. Relying on extensive process knowledge gained from serving countless industries, they can recommend process improvements and machinery upgrades that users would not have otherwise considered.

Booth A5448 will also feature fluid cell and deep draw sheet hydroforming demonstrations using a Triform model 610-20-3SC. Ideal for low-volume, high-mix part production, sheet hydroforming presses use a single, unmated tool and a pressurized rubber diaphragm to form parts with smooth, uniform, scratch-free surfaces that typically require no additional finishing.

Don’t miss this opportunity to develop your unique forming solution. Email fabtech@beckwoodpress.com to reserve your spot at the LAUNCH™ simulator.

About Beckwood Press Company

[Beckwood Press Company](#) is a leading manufacturer of high-quality, custom hydraulic presses and fully-automated production lines. Located in St. Louis, MO – USA, Beckwood manufactures machinery for virtually every industry and application including a line of temperature controlled presses for [compression molding](#), [composite forming](#) and [high-temperature Hot Forming / SPF applications](#). Beckwood also manufactures the Triform line of specialty forming equipment which includes fluid cell and deep draw [sheet hydroforming presses](#), [hydraulic ring expanders](#), [hot joggle presses](#), and [stretch forming machines](#).
