

## **DOUGLAS COUNTY, NEBRASKA GOES LIVE WITH STATE OF THE ART LAND RECORDS SYSTEM, LANDMARK**

*Douglas County Assessor/Register of Deeds has a new Land Records management system from Pioneer Technology Group that will help to streamline interactions with public records for its citizens.*

Douglas County now offers its citizen's access to the industry's most powerful Land Records system. Pioneer Technology Group successfully converted all of the historical data and images from the legacy system into Landmark. The move to Landmark has provided the Assessor/Register of Deeds with many efficiency gains including immediate access to the indexes and images online with a subscription.

Using Landmark, Douglas County Recorders now have the ability to scan all recordable documents immediately upon receipt and use electronic queues to move documents through the recording process. Recorded documents are available on the public access site, real time, as soon as they are recorded within Landmark. This time saving efficiency will provide an improved customer service experience to the customers of Douglas County for years to come.

"After 31 years of using an antiquated recording system we are finally emerging into the 21<sup>st</sup> century of technology with Pioneer's Landmark system," said Diane Battiato, Assessor and Register of Deeds in Douglas County, NE.

Douglas County, NE joins the growing list of customers to go live with Landmark from Pioneer Technology Group in across the country. Pioneer also provides a full suite of products that are designed to streamline daily tasks across the board for government entities including Benchmark, Pioneer's Court Case Management system, Axia, a Property Tax Appeals system, Excise, specializing in tourist / bed taxes, and Jurymark, a state-of-the-art Jury Panel Management system.

Vice President of Operations for Pioneer, Kevin Koon-Koon had this to say: "As a company, we pride ourselves in the strong partnerships we build with each and every installation. Seeing the Pioneer team and Douglas team working together for a united cause only reinforces our confidence in the continued mutual success we will share in the years to come through this valued partnership."

### **About Pioneer Technology Group**

Pioneer Technology Group (Pioneer) is a leading developer of software solutions and services to Governments and the private sector. The company is headquartered in Sanford, Florida and recently opened a location in Wooster, Ohio. Offerings include: Benchmark, a court case management system, the Landmark official records system, the YourDox title document system, and tax processing systems for counties and municipalities. Pioneer also provides content management systems and a scanning services bureau for transitioning paper to digital images through its subsidiary, Pioneer Records Management.
