Pulse Announces New Version of PulseCloud^{TM}

Leading Practice Management Solution Enhances Integration Capabilities and Revenue Cycle Management Features for Improved Workflows

Kansas City, MO (October 9, 2017) – Pulse Systems, Inc., an industry-leading provider of Electronic Health Record (EHR), Practice Management (PM) and Revenue Cycle Management (RCM) solutions, today announced the new release of PulseCloud^{TM} version 10.9, enabling medical practices to pair the solution with their existing EHR system. Pulse will be showcasing the new features of its modern and user-friendly practice management platform at the MGMA conference in Anaheim, California, October 8-11, 2017.

By supporting organizations' existing medical workflow, PulseCloud offers physicians a cost-effective and flexible platform that equips them with industry-leading business tools to manage both their practice and revenue cycle. PulseCloud is a flexible platform that consolidates all billing and collection tasks into one RCM work queue. A billing specialist will know exactly what tasks must be completed in a given workday — remits to post, rejected claims to review, updated claims to refile — ensuring physicians get reimbursed quickly and accurately.

"Physicians can maintain their existing clinical workflows uninterrupted because PulseCloud can now interface to a practice's existing EHR system and offer industry-leading tools to manage the business side of the practice," said Chris Walls, President and CEO of Pulse. "Providers using PulseCloud for managing their revenue cycle, get claims processed faster and more accurately, fewer claim rejections and ultimately more revenue."

PulseCloud is an easy-to-use solution that maintains compliance and keeps healthcare data secure. With PulseCloud, there is no hardware or software to install or maintain and the platform can easily scale to meet the capacity and performance needs of physician practices.

MGMA conference attendees can learn more about PulseCloud by visiting booth #1415 from October 8-11, 2017 in Anaheim, California.
