

HIPAA security is mandatory.

Will you be ready?

Prove compliance with confidence using HIPAA One

HIPAA One® is a cloud-based software solution developed by certified auditors and is based on many years of healthcare IT security experience. It provides a simple and intuitive workflow that ensures a successful Risk Management Program to satisfy your HIPAA Security Rule requirements.

Whether you are a Covered Entity, Business Associate, or seeking a partnership, HIPAA One® has a program to meet your needs.

“ We love the HIPAA One® software. It is easy to use, and the support staff is a pleasure to work with”

Swan L.

HIPAA Risk Analysis made easy!

HIPAA One
PROTECT YOUR ePHI

HIPAA Risk Assessments Made Easy

Protect your ePHI

Each HIPAA One subscription includes:

- One year of access to the HIPAA One® SaaS Platform
- Questionnaire-driven workflow based on industry-standard NIST 800-series scripts
- Nessus Professional Feed® Vulnerability Scan
- Policies and Procedures Templates
- Automated Risk Analysis, Documentation and Reporting
- Unlimited Users and Remediation Updates
- State, Federal, and Best Practice Updates
- Access to Qualified Audit Support Services
- \$100,000 Breach Assurance*
- “Certified Compliant” Seal for practice website and marketing materials
- Data portability – all data exportable to PDF or .csv file formats

*Terms and conditions apply to Breach Assurance coverage

The Confirmation Page within the HIPAA One® application includes graphical summaries of Risk Status, Required Actions/Updates, and links to the Action Plan and final SRA Report.

HIPAA One® has consolidated HIPAA with other industry best practices into a Common Control Framework that is aligned to the HIPAA Security Rule. Key areas addressed are:

DISCOVER

Learn the requirements and meet with the responsible parties

EVALUATE

Review the scope of current systems, audit trails and processes

TEST

IT penetration testing and ethical hacking to identify weaknesses

ANALYZE

Review results to determine the applicable areas of focus

UPDATE

Implement systems & procedures and provide ongoing updates

In addition to the HIPAA One® tool, you and your staff can access whatever level of professional services needed to build your organization's security program.

Depending on which package you select, our expert consultants can help you:

- Train key staff on use of the HIPAA One® tool
- Educate staff on HIPAA compliance and security obligations under MU
- Develop policies and procedures as part of your overall security program
- Evaluate handling of ePHI in your organization
- Assist with interpreting SRA results and implementing corrective actions

The HIPAA One® Audit Support Team (AST) is a team of professionals with special expertise in HIPAA regulations and data security, as well as best practices across industry verticals. When you work with our AST, either remotely or onsite, you have the option to receive the level of assistance that best suits the HIPAA needs of your organization – at a fraction of the cost of most other HIPAA security consulting offerings.
