

SWITCH

MOBILITY SIMPLIFIED

Switch is the world's most comprehensive Mobility-as-a-Service (MaaS) solution, that providing users the freedom of mobility to travel wherever, whenever. With an easy-to-use interface that enables you to locate routes, schedule on-demand or recurring trips, and instantly pay, **Switch** saves you time and money by bringing the entire travel experience to the palm of your hand.

Key Features:

| YOUR RIDE, YOUR WAY

Switch is built around the view of mobility for each person, meaning it is fully customizable to meet unique needs and preferences of each user. Be it public transport, rideshare, carshare, bikeshare, train, tram, or taxi, **Switch** organizes and optimizes all your travel options so you don't have to.

| FULLY AUTOMATED

Switch utilizes fully automated scheduling and dispatching to conveniently deliver a seamless mobility experience.

| ONE CLICK PAY-N-GO

No need for cash! With **Switch**, you can pay for your ride and instantly receive your ticket on your phone.

| DYNAMIC FEEDBACK

Switch provides an opportunity for users to provide real-time feedback about what they love and what they would like to see improved.

| UNPARALLELED FLEXIBILITY

Switch allows you to compare different mobility options in real-time and instantly book what works best for you. **Switch** provides instant access to varied service types – Microtransit, On-Demand, ADA Compliant, and all other modes of travel conveniently connected to a MaaS application.
