

2017 CALNOC Performance Excellence Awards

The Collaborative Alliance for Nursing Outcomes (CALNOC) is pleased to recognize the following hospitals for their exemplary work in reducing Hospital Acquired Conditions:

Hospitals with Average Daily Census (ADC) 200+

Adventist Health Bakersfield

Best Performance in Preventing Injury Falls
Best Performance in Preventing Hospital Acquired Infections-CLABSI Total Facility
Best Performance in Preventing Hospital Acquired Infections-CAUTI Total Facility
Best Performance in Preventing Hospital Acquired Infections-C. difficile Total Facility

Adventist Health White Memorial

Best Performance in Preventing Injury Falls
Best Performance in Preventing Hospital Acquired Infections – CLABSI Total Facility
Best Performance in Preventing Hospital Acquired Infections – CAUTI Total Facility
Best Performance in Preventing Hospital Acquired Infections – C. difficile Total Facility

Cedars-Sinai Medical Center

Best Performance in Preventing Hospital Acquired Infections – CLABSI Total Facility
Best Performance in Preventing Hospital Acquired Infections – CAUTI Total Facility

Children’s Hospital of Los Angeles

Best Performance in Preventing Hospital Acquired Infections – CAUTI Total Facility
Best Performance in Preventing Hospital Acquired Infections – MRSA Total Facility

Citrus Valley Medical Center

Best Performance in Preventing Hospital Acquired Infections – CAUTI Total Facility
Best Performance in Preventing Hospital Acquired Infections – C. difficile Total Facility

Dignity Health - Chandler Regional Hospital - Arizona

Best Performance in Preventing Hospital Acquired Pressure Injuries

Dignity Health - St. Joseph Medical Center-Stockton

Best Performance in Preventing Hospital Acquired Infections – CLABSI Total Facility
Best Performance in Preventing Hospital Acquired Infections – CAUTI Total Facility

Doctors Medical Center Modesto

Best Performance in Preventing Injury Falls
Best Performance in Preventing Hospital Acquired Infections – CLABSI Total Facility
Best Performance in Preventing Hospital Acquired Infections – C. difficile Total Facility

2017 CALNOC Performance Excellence Awards

Fountain Valley Regional Hospital Medical Center

- Best Performance in Preventing Injury Falls*
- Best Performance in Preventing Hospital Acquired Pressure Injuries*
- Best Performance in Preventing Hospital Acquired Infections – CAUTI Total Facility*
- Best Performance in Preventing Hospital Acquired Infections – MRSA Total Facility*
- Best Performance in Preventing Hospital Acquired Infections – C. difficile Total Facility*

Kaiser Permanente - Downey Medical Center

- Best Performance in Preventing Hospital Acquired Infections – CAUTI Total Facility*

Kaiser Permanente - Fontana

- Best Performance in Preventing Hospital Acquired Pressure Injuries*
- Best Performance in Preventing Hospital Acquired Infections – CAUTI Total Facility*
- Best Performance in Preventing Hospital Acquired Infections – MRSA Total Facility*
- Best Performance in Preventing Hospital Acquired Infections – C. difficile Total Facility*

Kaiser Permanente - Los Angeles

- Best Performance in Preventing Hospital Acquired Infections – MRSA Total Facility*

Kaiser Permanente - Sunnyside-Oregon

- Best Performance in Preventing Injury Falls*
- Best Performance in Preventing Hospital Acquired Pressure Injuries*
- Best Performance in Preventing Hospital Acquired Infections – CLABSI Total Facility*
- Best Performance in Preventing Hospital Acquired Infections – CAUTI Total Facility*
- Best Performance in Preventing Hospital Acquired Infections – C. difficile Total Facility*

Kaiser Permanente - Zion Medical Center

- Best Performance in Preventing Hospital Acquired Infections – CLABSI Total Facility*
- Best Performance in Preventing Hospital Acquired Infections – MRSA Total Facility*

Long Beach Memorial

- Best Performance in Preventing Hospital Acquired Infections – CAUTI Total Facility*

Methodist Hospital of Southern California

- Best Performance in Preventing Hospital Acquired Pressure Injuries*
- Best Performance in Preventing Hospital Acquired Infections – CLABSI Total Facility*
- Best Performance in Preventing Hospital Acquired Infections – CAUTI Total Facility*
- Best Performance in Preventing Hospital Acquired Infections – C. difficile Total Facility*

Miller Children's Hospital

- Best Performance in Preventing Hospital Acquired Infections – CAUTI Total Facility*

2017 CALNOC Performance Excellence Awards

PIH Health Hospital-Whittier

Best Performance in Preventing Hospital Acquired Infections - CLABSI Total Facility

Providence Holy Cross

Best Performance in Preventing Hospital Acquired Pressure Injuries

Providence Little Company of Mary - Torrance

Best Performance in Preventing Hospital Acquired Infections – CLABSI Total Facility

Best Performance in Preventing Hospital Acquired Infections – CAUTI Total Facility

Best Performance in Preventing Hospital Acquired Infections – MRSA Total Facility

Best Performance in Preventing Hospital Acquired Infections – C. difficile Total Facility

Providence Saint Joseph Medical

Best Performance in Preventing Hospital Acquired Infections – CLABSI Total Facility

Best Performance in Preventing Hospital Acquired Infections – C. difficile Total Facility

Santa Barbara Cottage Hospital

Best Performance in Preventing Injury Falls

Santa Clara Valley Medical Center

Best Performance in Preventing Hospital Acquired Pressure Injuries

Best Performance in Preventing Hospital Acquired Infections – MRSA Total Facility

Sharp Memorial Hospital

Best Performance in Preventing Hospital Acquired Pressure Injuries

Best Performance in Preventing Hospital Acquired Infections – CLABSI Total Facility

Best Performance in Preventing Hospital Acquired Infections – C. difficile Total Facility

St. Francis Medical Center-Lynwood

Best Performance in Preventing Hospital Acquired Infections – CAUTI Total Facility

Best Performance in Preventing Hospital Acquired Infections – MRSA Total Facility

Best Performance in Preventing Hospital Acquired Infections – C. difficile Total Facility

Sutter Medical Center Sacramento

Best Performance in Preventing Hospital Acquired Infections – CAUTI Total Facility

Best Performance in Preventing Hospital Acquired Infections – C. difficile Total Facility

Torrance Memorial Medical Center

Best Performance in Preventing Hospital Acquired Pressure Injuries

Best Performance in Preventing Hospital Acquired Infections – CLABSI Total Facility

2017 CALNOC Performance Excellence Awards

Tri City Medical Center

Best Performance in Preventing Hospital Acquired Infections – CLABSI Total Facility

Best Performance in Preventing Hospital Acquired Infections – CAUTI Total Facility

UC Davis Health System

Best Performance in Preventing Hospital Acquired Pressure Injuries

Best Performance in Preventing Hospital Acquired Infections – CAUTI Total Facility

UC Irvine Medical Center

Best Performance in Preventing Hospital Acquired Infections – CLABSI Total Facility

Best Performance in Preventing Hospital Acquired Infections – CAUTI Total Facility

UCSD Medical Center

Best Performance in Preventing Hospital Acquired Pressure Injuries

Best Performance in Preventing Hospital Acquired Infections – CAUTI Total Facility

Best Performance in Preventing Hospital Acquired Infections – C. difficile Total Facility

Hospitals with Average Daily Census (ADC) < 200

Adventist Health Castle

Best Performance in Preventing Injury Falls

Adventist Health Clear Lake

Best Performance in Preventing Injury Falls

Adventist Health Medical Center-Hanford & Selma

Best Performance in Preventing Hospital Acquired Pressure Injuries

Adventist Health Howard Memorial

Best Performance in Preventing Injury Falls

Adventist Health Medical Center-Portland

Best Performance in Preventing Hospital Acquired Infections – CLABSI Total Facility

Best Performance in Preventing Hospital Acquired Infections – CAUTI Total Facility

Best Performance in Preventing Hospital Acquired Infections – MRSA Total Facility

Best Performance in Preventing Hospital Acquired Infections – C. difficile Total Facility

Adventist Health Medical Center-Reedley

Best Performance in Preventing Injury Falls

Best Performance in Preventing Hospital Acquired Pressure Injuries

2017 CALNOC Performance Excellence Awards

Adventist Health St. Helena

Best Performance in Preventing Injury Falls

Best Performance in Preventing Hospital Acquired Infections – MRSA Total Facility

Award Criteria:

Best Performance in Preventing Injury Falls

Measure: Percent of Reported Falls Resulting in Moderate+ Injury or Greater (Adult Acute Care)

Award Criteria:

ADC <200: Zero Moderate or greater Injury Falls All 4 quarters

ADC 200+: Zero Moderate or Greater Injury Falls 3 or more quarters, or average for year < 1%

Best Performance in Preventing Hospital Acquired Pressure Injuries

Measure: Percent of Patients with Hospital Acquired Pressure Injuries Stage II or Greater (Adult Acute Care)

Award Criteria (all hospitals):

1. Risk Adjusted HAPU II+ “Better than Expected” *

OR

2. Zero HAPU II+ All 4 Quarters

Best Performance in Preventing Hospital Acquired Infections

Measures: Standardized Infection Rate and Actual Observed Infection Rate – data downloaded from CDC-NHSN. Calculation method applies to all infection types for total facility data on CLABSI, CAUTI, MRSA, Cdiff

Award Criteria:

ADC <200: Zero infections in all 4 quarters or Annualized Average SIR at or below the 25th quartile in CALNOC distribution

ADC 200+: Zero infections in all 4 quarters or Annualized Average SIR at or below the 50th quartile in CALNOC distribution

*2016 Data predicted in risk adjustment analysis by patient characteristics and 2014-2015 performance. Note: For HAPI 2+, hospitals are not separated by ADC. Risk Adjustment applies to all hospitals, but is most applicable to large and medium hospitals if “expected” number of patients with HAPI 2+ is 5 or more
