Envirosight Releases New Traffic Safety Poster for Sewer Workers.

Free poster illustrates the details that go into proper traffic work zone setup.

Randolph, NJ—November 1, 2017— A new, free poster from Envirosight illustrates how sewer inspection crews can maintain compliant work zones in a variety to traffic patterns and scenarios, start to finish. Following guidance from the Federal Highway Administration on appropriate work zone setup, this poster provides an easy-to-follow visual reference for reducing traffic safety risks to both workers and drivers.

“Advance notice of crew presence and changes in traffic flow helps make drivers extra aware of their surroundings,” explains Katie Breeden, Envirosight’s Marketing Assistant. “There are requirements that need to be followed when setting up work zones, but those vary by street size and traffic volume. We made this poster as a reference for sewer inspection crews working out on the roads to encourage traffic safety.”

This poster was designed as part of Envirosight’s continuing commitment to create and provide resources that benefit the wastewater industry. Request a free copy of the poster at: <http://inbound.envirosight.com/traffic-safety-poster>.
