

MOBILEUP PARTNER PROFILE

Add a secure student-to-student marketplace to your mobile solution for student engagement

MobileUp Software’s partnership with Ulyngo, Inc., empowers students to buy and sell used items through a secure online marketplace that is integrated with your school’s branded app.

Since launching in 2015, Ulyngo has given universities access to used goods on campus and empowers them to safely facilitate, manage, and monetize student-to-student commerce.

Students now can use their school-branded app from MobileUp Software to create and access Ulyngo accounts in the same place where they receive messages, calendars of events and activities, tradition checklists, orientation tasks, and other information.

This example shows how students can access the Ulyngo marketplace from a single tap on their app home screen and begin buying and selling their used goods.
