Envirosight Releases New White Paper on Managing Cost-of-Ownership for Sewer Inspection Crawlers.

This free paper highlights what influences cost-of-ownership and provides tips for keeping it low.

Randolph, NJ—November 29, 2017— Acquiring a sewer inspection crawler is costly, but maintaining its performance doesn't have to be. *7 Secrets to Low Cost-of-Ownership for Sewer Crawlers* is a new, free white paper published by Envirosight that details steps operators and supervisors can take to minimize cost-of-ownership. It examines the qualities of a crawler that can affect cost-of-ownership, as well as the impact of operating techniques, cleaning, care and preventative maintenance.

"Minimizing repairs and downtime directly impacts your productivity and profitability," explains Steve Webster, Channel Development Manager for Envirosight. "Whether you're a city or a contractor, there are simple steps you can take to control costs and keep work on schedule."

"A sewer inspection crawler is a sophisticated piece of technology that is subjected to some of the harshest, most abusive environments you'll find," notes Jake Wells, Marketing Director at Envirosight. "While routine upkeep may seem obvious, there are other factors that get overlooked."

This white paper was written as part of Envirosight's continuing commitment to create and provide resources that benefit the wastewater industry. Download the white paper now at: <http://inbound.envirosight.com/seven-secrets-to-low-cost-of-ownership>
