**Envirosight Releases White Paper on Top Crawler Considerations.**

*This free paper lists the top 10 factors to consider when choosing an inspection crawler.*

**Randolph, NJ—December 12, 2017—** Envirosight has released a new white paper titled *Top 10 Considerations When Buying a Pipe Inspection Crawler*. Written in a simple step-by-step format, it provides an overview of factors to consider during evaluation and procurement, from physical attributes like maneuverability, adaptability and portability, to less tangible characteristics like cost of ownership and service life.

“Sewer inspection crawlers are essential for municipalities and contractors to properly inspect pipelines,” says Steve Webster, Channel Development Manager for Envirosight. “An inspection crawler is the foundation of any maintenance program because you can’t fix what you can’t see. Buying one is an investment, so it’s worth the time and research to ensure a good decision.”

This white paper was designed as part of Envirosight’s continuing commitment to provide resources that benefit the wastewater industry. Download the white paper now at: <http://inbound.envirosight.com/top-10-pipe-inspection-crawler-considerations>.
