Rigaku will showcase its XRD and XRF instrumentation at the 2017 Materials Research Society Fall Meeting & Exhibit in Boston

November 27, 2017 – Boston, MA. [Rigaku Corporation](#) is presenting its diverse lines of X-ray diffraction ([XRD](#)), X-ray fluorescence ([XRF](#)) and [Raman spectroscopy](#) instrumentation at the [2017 MRS Fall Meeting and Exhibit](#), Sunday November 26 to Friday, December 1, 2017. The event is organized by the [Materials Research Society](#) and will be held at the [Hynes Convention Center](#) and adjacent [Sheraton Boston Hotel](#) in Boston, Massachusetts. Rigaku, a global leader in X-ray analytical instrumentation, will be exhibiting at the event at booth #513.

The conference is a leading event highlighting cross-disciplinary worldwide activity in materials research, gathering a diverse global audience of chemists, physicists, materials scientists, biologists, engineers and others. The event features over 50 symposia and is attended by as many as 6,000 researchers from around the world.

Rigaku provides the world's most complete line of X-ray analytical instruments and components, including benchtop XRD and XRF systems, X-ray optics and detectors. Materials analysis instrumentation from Rigaku ranges from benchtop devices, suited for researchers employing X-ray techniques, to high-end instruments with advanced analytical capabilities. Among the instruments featured at the event will be the sixth generation [Rigaku MiniFlex](#) benchtop X-ray diffraction instrument. The MiniFlex is a general purpose X-ray diffractometer that can perform qualitative and quantitative analysis of polycrystalline materials

More information about the MiniFlex benchtop X-ray diffractometer is available at www.myminiflex.com.

About Rigaku

Since its inception in Japan in 1951, Rigaku has been at the forefront of analytical and industrial instrumentation technology. Rigaku and its subsidiaries form a global group focused on general-purpose analytical instrumentation and the life sciences. With hundreds of major innovations to their credit, Rigaku companies are world leaders in X-ray spectrometry, diffraction, and optics, as well as small molecule and protein crystallography and semiconductor metrology. Today, Rigaku employs over 1,400 people in the manufacturing and support of its analytical equipment, which is used in more than 90 countries around the world supporting research, development, and quality assurance activities. Throughout the world, Rigaku continuously promotes partnerships, dialog, and innovation within the global scientific and industrial communities.
