

iPatientCare EHR Receives 2015 ONC Health IT Certification from Drummond Group

iPatientCare EHR achieves 2015 edition ONC Health IT Certification

Woodbridge, NJ, December 06, 2017 — iPatientCare, a pioneer in cloud-based ambulatory and inpatient EHR and Revenue Cycle Management services announced iPatientCare EHR achieving 2015 ONC Health IT certification by [Drummond Group](#), an Office of the National Coordinator-Authorized Certification Body (ONC-ACB), in accordance with the applicable eligible professional certification criteria adopted by the Secretary of Health and Human Services (HHS).

iPatientCare EHR is one of the early achievers of 2015 edition certification that supports requirements of Modified Meaningful Use (MU) Stage 2, Meaningful Use Stage 3, Advancing Care Information (ACI), ACI transition requirements, and Comprehensive Primary Care Plus (CPC+). The certification testing involved an elaborate process that required [iPatientCare EHR](#) to successfully pass hundreds of rigorous and detailed test steps demonstrating capabilities to support Meaningful Use Stage 3 and MIPS measures. Meaningful Use Stage 3 changes include higher thresholds of utilization compared to Stage 1 and 2, expanded Clinical Quality Measures (CQMs), and new data exchange requirements.

Comprehensive Primary Care Plus (CPC+) is a national advanced primary care medical home model that aims to strengthen primary care through regionally-based multi-payer payment reform and care delivery transformation. Elaborating on CPC+, [Arnaz Bharucha](#) and [Vipul Patel](#), iPatientCare’s Sr. Technology Officers and Chief Incubators of iPatientCare Quality Programs said, “There are very few 2015 edition EHR that support all criteria required for the CPC+ program. iPatientCare EHR is one among these select few EHR, and in fact, the fourth EHR in the CHPL list today that is certified for the care plan.”

Substantiating the upbeat spirits at iPatientCare, added iPatientCare’s Chief Technology and Innovations Officer, [Kedar Mehta](#), “New iPatientCare enhancements will improve communication of clinical information for providers serving the healthcare industry. We view this certification as validating iPatientCare’s thought leadership among EHR products dedicated to furthering the transition to value-based healthcare under MACRA: MIPS/Advanced APM”

About iPatientCare:

Based at Woodbridge, New Jersey, iPatientCare is a private-held Corporation that is nationally recognized as one of the leading companies providing EHR and integrated MACRA-ready solutions and intelligent medical billing and revenue cycle enhancement services to physician offices providing primary and specialty care, rural health clinics, and community/federally qualified health centers (CHC/FQHC) nationwide.

At iPatientCare, we help healthcare providers to dramatically reduce A/R days and improve collections rates, reduce billing costs, eliminate the burden of repeatable, high volume work on their internal teams, and plug gaps in staffing and internal bandwidth. Our expert teams are comprised of senior

executives with extensive experience in clinically-driven revenue cycle management systems including certified billers and coders with managerial capabilities to facilitate client interactions, escalations and SLA. We also provide a dedicated account manager and a team of talented experts assigned to work as an extension of your office, instead of operating as an outsourced billing company or technology vendor.

iPatientCare EHR 18.0 has received 2015 Edition ONC Health IT certification by Drummond Group, an Office of the National Coordinator-Authorized Certification Body (ONC-ACB), in accordance with the applicable eligible professional certification criteria adopted by the Secretary of Health and Human Services (HHS). Full certification details can be found at [ONC Certified Health IT Product List](#). If desired, we make the difficult tasks of revenue cycle optimization and MACRA/PCMH/QR reporting easier by bundling innovative EHR and other cloud-based practice solutions as part of our revenue cycle management and MACRA consulting services at no additional costs.

As part of its MACRA-ready solutions, iPatientCare has been recognized as a qualified MACRA-MIPS registry for the year 2017 by CMS, and has a distinguished credit of being selected as a preferred EHR vendor and medical/chiropractic billing company by more than 70,000 users nationwide, numerous hospitals/health systems, federally funded regional extension centers, and in the past by the US Army and NASA Space Medicine.

About ONC Certification

The ONC Certified Health IT Technology program tests and certifies that Health IT technology is capable of meeting the 2015 Edition criteria approved by the Secretary of Health and Human Services (HHS). The certifications include Complete EHRs, which meet all of the 2015 Edition criteria for either eligible provider or hospital technology and EHR Modules, which meet one or more — but not all — of the criteria.

About Drummond Group

Drummond Group brings our years of experience into play to provide effective and efficient electronic health record (EHR) testing to healthcare information technology developers - both vendors and hospitals that create their own systems. Accredited for the Office of the National Coordinator Health IT Certification Program as an Authorized Certification Body (ACB) and an Accredited Test Lab (ATL), Drummond Group works closely with EHR developers to test and certify solutions that providers can use to qualify for incentive funds under the American Recovery and Reinvestment Act (ARRA). Visit <https://www.drummondgroup.com/ehr-home> for more information.

*This Complete EHR is 2015 Edition compliant and has been certified by an ONC-ACB in accordance with the applicable certification criteria adopted by the Secretary of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services.
