

PRESS RELEASE

Horix Aerospace selects Quantum Control Logistics Software to manage and distribute its large spare parts stock worldwide

SAN DIEGO, CA – December 5, 2107 – [Component Control](#) announced today that Horix Aerospace, the only Swiss company specializing in unique aircraft spare parts distribution to the global aerospace industry, has selected [Quantum Control](#) MRO and Logistics Software to manage all of the logistics of its aerospace components stock. Based in Quartino Switzerland, [Horix Aerospace](#) mission is to be at the right time next to customers to keep them flying. In addition, Horix Aerospace is the only Swiss company to develop and manufacture innovative ground support equipment for skidded helicopters and wheeled aircrafts ([HELIFT™](#)).

“We analyzed many software solutions to meet our expectation of flexibility and we realized Quantum Control was the most used database in the aviation sector”, said Marco Taufer, Head of the Spare Parts Division. “We need an efficient tool to be able to ease the management of different stocks and thousands of different components. Quantum Control software can offer an intuitive interface with personalized configuration”, continues Marco Taufer. “This aviation management support allows [Horix Aerospace](#) to provide best service to our customers all around the world. We expect to grow our business and to improve our internal processes.”

“I am looking forward to supporting Horix’s continued growth and market success. Horix looks poised to grow rapidly and to fully leverage Quantum integrated software and comprehensive approach for global distribution and component management,” said Todd Lewis, President of Component Control.

About Component Control (a [CAMP Systems](#) Company)

Component Control, based in San Diego, California, is a leading developer and provider of MRO and Logistics Software solutions for the aviation industry.
