

PRESS RELEASE

Horix Aerospace selects Quantum Control Logistics Software to manage and distribute its large spare parts stock worldwide

Quartino, Switzerland – 31th October 2017 – [Horix Aerospace](http://www.horix.ch) announced today that a new business software solution has been chosen to manage all the logistics of its aerospace components stock. Quantum Control is now the main corporate database applied in the Spare Parts Division.

“We analyzed many software solutions to meet our expectation of flexibility and we realized Quantum Control was the most used database in the aviation sector”, said Marco Taufer, Head of Spare Parts Division. “We need an efficient tool able to ease the management of different stocks and thousands of different components. Quantum Control software can offer an intuitive interface with personalized configuration”, continues Marco Taufer. “This aviation management support allows [Horix Aerospace](http://www.horix.ch) to provide best service to our customers all around the world. We expect to grow our business and to improve our internal process”.

[Horix Aerospace](http://www.horix.ch) is the only Swiss company specialized in unique aircraft spare parts distribution to the global aerospace industry. Driven by aviation passion, [Horix Aerospace](http://www.horix.ch) mission is to be at the right time next to customers to keep them flying. In addition, [Horix Aerospace](http://www.horix.ch) is the only Swiss company to develop and manufacture innovative ground support equipment for skidded helicopters and wheeled aircrafts ([HELIFT™](http://www.horix.ch)). Thanks to professional experience in the logistic and aerospace sector, [Horix Aerospace](http://www.horix.ch) mission is to provide new and revolutionary solution to allow go flying in less possible time.
