

PRESS RELEASE

FOR IMMEDIATE RELEASE

Atmosera Approved to Deploy in Microsoft Azure Government

Microsoft Azure Government is the most trusted cloud for US government agencies and their partners which now includes Atmosera

PORTLAND, OR – December 14, 2017 – [Atmosera](#), a premier Tier-I Microsoft Cloud Solution Provider (CSP), today announced the availability of [Microsoft Azure Government](#) to customers who qualify for this secure, government-only cloud. Azure Government became available in [June 2017](#) through the Cloud Solution Provider (CSP) program and requires partners to qualify to deploy customers within its multiple data center regions. Atmosera’s success with government customers and their increasing demand to deploy in Azure made it an important mandate.

Azure Government offers world-class security and compliance for US federal, state, local, and tribal government agencies and their partners. It provides an environment for government-only workloads which is operated by screened US citizens. Customers can choose from six data center regions with DoD Impact Level 5 Provisional Authority (PA) including two dedicated regions for US Department of Defense workloads. Environments can leverage hybrid flexibility by maintaining some data and functionality on-premises. Azure Government also offers the most certifications of any cloud provider to simplify critical government compliance requirements.

“Atmosera has had the privilege to count many state and local government agencies as customers for over twenty years,” said Jon Thomsen, Chief Executive Officer, Atmosera. “We have seen a growing desire to use Azure by these agencies and the availability of Azure Government provides a highly secure and trustworthy cloud where we can deploy

and manage environments. The flexibility of hybrid environments makes it possible to transition workloads to the cloud as slowly or fast as desired by our customers.”

Azure Government regions where Atmosera can now deploy customers include:

- US Gov Virginia
- US Gov Indiana
- US Gov Arizona
- US Gov Texas
- US DOD East
- US DOD Central
