# EagleView Hires Ajai Sehgal as Chief Technology Officer

*Former Expedia co-founder tasked with growing company's advanced machine learning technologies*

**Bothell, WA (December 14, 2017)** – EagleView Technologies, the leading provider of Pictometry® aerial imagery and advanced property data solutions for the government, insurance, construction and energy markets, has named Ajai Sehgal its Chief Technology Officer, the company announced today. Sehgal will direct all of EagleView's technologies, from image capture and processing to delivery across platforms, with a particular focus on growing EagleView's application of Artificial Intelligence.

EagleView provides patented image capture processes and 3-D modeling software, along with property-centric analytic tools and platforms that empower end-user workflows in support of property claims, risk management, construction, emergency response, tax assessment, and corridor mapping.

"The pace of technology and innovation in machine learning today presents tremendous opportunities to create new solutions and change the way our customers do business," said Rishi Daga, CEO of EagleView. "Ajai's track record as an accomplished leader in developing new technologies and platforms will help EagleView as we continue to invest in the image capture capabilities and machine learning aspect of our business and grow as a technology company, globally."

Mr. Sehgal brings an impressive range of experiences leading large global teams and a strong background in aerial imaging, software development, IT, operations, security and related technology. He most recently was CIO/CTO at The Chemistry Group, and previously helped develop the technology at Hootsuite and Groupon. Notably, Sehgal was one of the co-founders of Expedia. Sehgal is currently an official member of the Forbes Technology Council.

"I am thrilled to be joining such a rapidly growing company and to have the opportunity to help shape EagleView's impressive work in machine learning and data analytics," said Sehgal. "I look forward to working with the team to find new ways of using this exciting technology to build platforms that solve problems and delight our customers."

### **About EagleView**

EagleView is the leading provider of high-resolution aerial imagery, property data analytics and structural measurements for government agencies, insurance carriers, roofing contractors and energy utilities. Using patented image capture techniques, 3D aerial measurement software and machine learning processes, EagleView helps customers answer questions related to millions of properties throughout the world. With a four-petabyte library of oblique and orthogonal Pictometry® aerial imagery dating back to 2001 and the capacity to process tens of thousands of roof measurement reports per day, EagleView enables organizations to reduce field visits and
