

Pulse announces release of PulseCloud™ 10.10

Leading Revenue Cycle Management Solution Provider Boosts Payment and Reconciliation Process

Kansas City, MO (December 19, 2017) – [Pulse Systems, Inc.](#), an industry-leading provider of Electronic Health Record (EHR), Practice Management (PM) and Revenue Cycle Management (RCM) solutions, today announced the new release of PulseCloud™ version 10.10, supporting a more robust billing process for physician practices through higher levels of efficiency and visibility into their revenue cycle operation.

With PulseCloud version 10.10, billing specialists have access to real-time analytics and more advanced reporting capabilities such as accounts receivable summary performance, revenue value units and daily activity by user reports. This new functionality helps them better manage the payment posting and reconciliation process. PulseCloud offers practices a secure end-to-end solution for their entire revenue cycle, allowing for quicker processing of payments, reimbursements and claims.

“PulseCloud gives physician practices a complete revenue cycle management platform for simplifying their payment process,” said Chris Walls, President and CEO of Pulse. “Through improved data analytics and reporting capabilities, physicians have enhanced visibility into their revenue cycle operation, enabling improvements in financial performance and ultimately their practice’s overall profitability.”

“PulseCloud is very intuitive and cost-effective,” said Stephanie Carruthers, Practice Manager at Lowe and Freyaldenhoven, MDs. “One of my favorite features is the queue in PulseCloud that alerts you if any claims have issues with them – knowing that right away saves me from having to write-off an entire claim for untimely filing.”

PulseCloud is a comprehensive suite of integrated technologies that support practice management, EHR, patient engagement, e-prescribing, billing, reporting and analytics. With PulseCloud, there is no hardware or software to install or maintain and the solution can easily scale to meet the capacity and performance needs of physician practices.

About Pulse

Pulse provides certified, integrated, electronic health care management systems to thousands of providers across more than 40 specialties nationwide.
