

CAPSTONE LEARNING ASSOCIATES MAKES THE TOP FE EXAM TRAINING COURSE AVAILABLE ONLINE

Capstone Learning provides online FE review for students preparing for the intensive Fundamentals of Engineering (FE) and Exam.

MENLO PARK, CA - January 11, 2018 - The Fundamentals of Engineering (FE) exam, a notoriously strenuous 8-hour exam, has been modified to one 6-hour session in a computer-based format (CBT). Traditionally, FE exam candidates spend large amounts of time and money to prepare for the exam; this preparation can take the form of a formalized classroom training program, or extensive hours of individual study. For exam candidates looking for a preparation method that perfectly aligns to the CBT format, combining the affordability and flexibility of self-study with the structure and the resources of a traditional classroom course (including 1 to 1 tutor support), there is Capstone Learning.

Capstone Learning offers an online FE prep course that was developed by FE instructors and learning design experts to help exam participants triumph over the FE CBT. With over 40 years of combined experience, the team behind the Capstone FE exam course has developed a program that provides students with what they need to succeed. Capstone offers a free module to try out their solution.

The robust Capstone curriculum is comprised of a series of online modules that are a welcomed departure from the standard, dry recorded lectures. Each learning module covers a discrete exam topic and includes cutting-edge visual representations of the exam material, detailed audio narrations with an accompanying transcript, and access to live, online tutors. The developers of the Capstone FE exam course were passionate about creating a prep course that was dynamic and effective, a far cry from the stagnant lists of recorded PDF and PowerPoint files that afflict most e-learning modules. With its own RIGOR methodology, a dynamic and repeatable method for applying the appropriate sections of the NCEES FE Reference Handbook to solve FE problems, the Capstone course replaces any other required text books or supplementary exam resources.
