New, Free Cable Machine Setup Poster from MyTana.

Handy reference guide illustrates common end tools and their recommended uses.

ST. PAUL, MN—January 19, 2018— A new, free poster from MyTana illustrates common cable machine end tools, along with the applications and line sizes to which each is best suited. This handy guide helps identify the best end tool for almost any blockage. With the proper setup, a drain-cleaning professional can clear lines faster, more effectively and with greater safety.

“Different clogs require different approaches,” explains Dale Graber, General Manager for MyTana. “Choosing the right tools gives you the ability to clean a pipe more thoroughly and in less time. A sharp, properly sized cutting tool also reduces stress on the cable and drive system of the cable machine.”

“The poster is a must-have reference for any sewer or drain cleaning professional,” says Nicole Lygo with MyTana’s marketing department. “We look forward to sharing more informational content like this with the market in the future.”

Request a free copy of the poster at: <http://inbound.mytana.com/cable-machine-setup-poster>.
