MVP Systems Software Opens JAMS University

MVP Systems Software launches a training program for workload automation professionals at its new facility in Unionville, CT.

24 January 2018 – MVP Systems Software, Inc., a leading provider of enterprise job scheduling and workload automation software, announced today the opening of JAMS University, a comprehensive training program for workload automation with the company's flagship solution JAMS. The program provides technology professionals with the foundational skills needed to operate and administer JAMS, and prepares them for leveraging enterprise automation in a wide variety of business situations.

"JAMS University combines technical instruction in workload automation with practical application," says Daniel St. Jean, Senior Support Engineer and a JAMS University Instructor. "Mastering all the fundamental aspects of automation helps your team get the maximum value out of JAMS, but understanding the strategies and best practices employed by our most advanced users helps your team become an invaluable asset to any enterprise."

JAMS University sessions are held at MVP's training facility in Unionville, CT. Participants have access to a large-scale demo environment that helps them gain invaluable experience with:
- Cloud and Hybrid Deployments
- Migration from Legacy Scheduling Tools
- High Availability
- Job Resiliency
- Dashboards and Reporting

All sessions are taught by certified JAMS Engineers who have extensive experience deploying MVP's solutions. Custom modules may be included for enterprises that would like to focus on automating specific business applications or whose developers are interested in integrating JAMS with custom applications.

For a complete overview of the curriculum, visit the JAMS website:
http://www.jamsscheduler.com/university/

Participants who complete the JAMS University program will be recognized as Certified JAMS Workload Automation Professionals.

About JAMS
JAMS is the only job scheduling system built on a .NET framework and is the first enterprise job scheduling system that can be leveraged by both IT Operations Personnel and Application Developers. With its roots in Windows, JAMS also supports running processes across a variety of operating systems (UNIX, Linux, System i, OpenVMS, etc.) and applications (PeopleSoft, SAP, SQL, Oracle, Symitar, Ecometry, Banner, etc.) To learn more about JAMS, please visit www.JAMSScheduler.com or call 800-261-JAMS.
