Meet The World's First Online Carbon Fiber Factory With Instant Quote

Cloud Factory Ltd launches OrderCarbon.com, first of its kind online carbon fiber factory that offers a possibility to order custom made carbon fiber parts in small series and gives clients an instant quote for their order.

Carbon fiber is increasingly regarded as a wonder material for the clean economy. Its unique combination of high strength and low weight has made it stand out among other fibers. The major advantages of carbon fiber over traditional materials like steel, aluminum, wood and plastics include: high stiffness, lightweight, thermal and electrical conductivity, chemical resistivity, high strength, corrosion resistance.

OrderCarbon.com is proud to bring to the notice of companies, members of the European Union and the general public at large, the services of OrderCarbon.com, a subsidiary of Cloud Factory Ltd, a company that manufactures high quality carbon fiber and sells custom made products made in the EU.

This company is the first online carbon fiber factory in the world with their easy-to-use online platform that provides clients the ability to order carbon fiber products with only few steps and access an instant quote almost immediately. OrderCarbon.com provides clients an opportunity to find a manufacturer to their custom carbon fiber items also in very small quantities!

Cloud Factory company uses molding technology with RTM to produce carbon fiber sheets. Advantage of RTM (Resin Transfer Molding) and compression molding technology includes: Good mechanical properties (better strength and toughness than with hand laminating), increased precision, higher fiber content up to 70%, lower price for series due to faster production speed, it's also environmentally friendly and non-harmful for its workers.

OrderCarbon.com manufacturing team uses only high quality raw materials from the same factories who produce raw materials for aerospace and automotive industry (Lamborghini, McLaren and Airbus).

Cloud Factory Ltd, was founded in August of 2017 in Tallinn, Estonia, with the sole responsibility of providing the European Union and the world at large with high quality Carbon Fiber products.

"Our goal is to make carbon fiber products more accessible for private clients and to create an environment that allows SME's to help grow their businesses by automating customer relationships" Taavi Kikas, CEO, Cloud Factory Ltd

Company is founded by Estonian entrepreneur, 3D printing specialist and Startup educator Taavi Kikas who has a vast experience in the field of online services and manufacturing as he is also co-founder of 3DPrinterOS- an easy-to-use platform for managing files, machines and users for 3D printing.

For more information about the company, or to get in touch with their team of experts, log into their website at [OrderCarbon.com](https://ordercarbon.com) or email them at info@ordercarbon.com.
