

Flagship Biosciences *ActionAnalysis*[™] Solutions Accelerate Drug Development

*Ready-to-use and custom image analysis meet
current and future development needs*

Westminster, CO, February 12, 2018 – Flagship Biosciences is adding to its menu of ready-to-use image solutions with the introduction of *ActionAnalysis*. As the most experienced, integrated clinical laboratory, Flagship’s *ActionAnalysis* solutions help drug developers rapidly evaluate existing targets to define a biomarker-driven path to success.

ActionAnalysis accelerates and simplifies tissue image analysis through trend analysis, tissue wide expression and relative rank ordering, with no upfront algorithm development.

“*ActionAnalysis* quickly generates hypotheses to help drug developers focus their biomarker strategy, reduce the risk of failure and accelerate drug development,” says Trevor Johnson, Flagship General Manager and COO. “We offer the experience and expertise to facilitate critical decision points at every stage of development, from generating hypotheses about mechanism of action, to patient selection and companion diagnostics.”

As the only fully integrated, full-service image analysis and CLIA-certified lab service in the U.S., Flagship combines the expertise of pathologists, scientists, histologists and image analysts to generate and interpret contextual tissue data and answer the most challenging pathology questions.

Visit Flagship Biosciences at the Molecular Medicine Tri-Conference, February 12-14, 2018, booth #119, to learn more about *ActionAnalysis* and Flagship’s Computational Tissue Analysis (cTA[®]) solutions for precision medicine.

About Flagship Biosciences

Flagship Biosciences helps drug developers confidently define their path to success. By leveraging our unique Computational Tissue Analysis (cTA[®]) and Data-Driven-Decision Support Platform, we provide quantitative and contextual tissue interpretation to make timely decisions. For more information on how Flagship accelerates drug development, please visit the Company's website: www.flagshipbio.com.
