New iOS Tixeo App: For safer videoconferencing

Tixeo, a European software company specialized in secure video conferencing, launches its new iOS app allowing to organize and participate privately to meetings from iPhone and iPad. This is the first time that a professional secure videoconferencing app is available for free on App Store.

By launching this app, Tixeo meets the mobility, security and privacy needs of Apple users for the organization of their online meetings. The users already had Tixeo solutions on macOS-based computers, they can now find the Tixeo universe under iOS.

Highly private videoconferencing on iOS

To adapt to the security and privacy requirements linked to employees' mobility, Tixeo teams have developed the same security mechanisms as those deployed on MacOS and Windows solutions (certified and qualified by ANSSI[1]) as a real end-to-end encrypted communication (audio, video, chat, data) in a multi-point video conference, link encryption or not having ports to open.

All Tixeo benefits on iPhone and iPad

The app user interface is the same as on macOS, Android or PC. In addition, it is now possible to benefit of all advantages of Tixeo video conferencing on Apple mobile devices.

iOS users will also enjoy Tixeo's high audio/video quality with SVC[2] on Demand technology that allows you to adapt streams to networks (3G/4G/wifi). Regarding the collaboration, all Tixeo's features are available: document, app and desktop sharing, remote control, file transfer, record and livestreaming, corporate messaging and end-to-end encrypted chat.

Finally, this new app allows perfect interoperability with legacy videoconferencing systems (H. 323 / SIP) and phone network (incoming and outcoming calls).

The Tixeo app can be downloaded for free on App Store

About Tixeo

Tixeo has been designing secure video conferencing solutions for more than 10 years. The design and development of its software are exclusively made in Europe. The Tixeo solution allows to meet in HD video conferencing from any equipment, while offering advanced collaboration features. Safety is taken into account at all stages of the conception (Secure by design). It is available as a Cloud service, an on-premise server or outsourced (TixeoCloud, TixeoServer or TixeoPrivateCloud). The H.323 / SIP TixeoGateway service enriches these offers. For those wishing to equip new rooms, prefer TixeoRoom to a proprietary solution. It will integrate naturally into the secured infrastructure, while reducing installation and administration costs.

Customers worldwide from SMB to large corporation trust Tixeo: Nexter, DCI, Eurenco, DGA (the French Defense Procurement Agency), DGAC (French Civil Aviation Authority), CNRS (French national center for scientific research), universities and training centers. Tixeo's technology is certified (CSPN) and qualified (Elementary qualification) by the National Cybersecurity Agency of France (ANSSI).

Tixeo is recognized for the quality, ease-of-use and security of its solutions.
