

Atmosera Recognized for Excellence in Managed IT Services

PORTLAND, Ore. - - February 20, 2018 - - [Atmosera](#), a premier Tier-I Microsoft Cloud Solution Provider (CSP), announced today that [CRN](#), a brand of [The Channel Company](#), has named Atmosera to its 2018 Managed Service Provider (MSP) 500 list in the Managed Security 100 category. This annual list recognizes North American solution providers with cutting-edge approaches to delivering managed services. Their offerings help companies navigate the complex and ever-changing landscape of IT, improve operational efficiencies, and maximize their return on IT investments.

In today's fast-paced business environments, MSPs play an important role in helping companies leverage new technologies without straining their budgets or losing focus on their core business. CRN's MSP 500 list shines a light on the most forward-thinking and innovative of these key organizations.

The list is divided into three categories: the MSP Pioneer 250, recognizing companies with business models weighted toward managed services and largely focused on the SMB market; the MSP Elite 150, recognizing large, data center-focused MSPs with a strong mix of on-premises and off-premises services; and the Managed Security 100, recognizing MSPs focused primarily on off-premise, cloud-based security services.

Atmosera delivers solutions that accelerate the value of the Microsoft Cloud Platform and Azure. We provide the end-to-end solution including the assessment, migration, re-platforming, and on-going operations of complex global public, private, and hybrid cloud environments. Our business is built on ensuring customer environments are secure from design through deployment and to provide solutions which are realistically implementable. We offer a full complement of managed Information Security (InfoSec) services including enterprise defense in depth, data protection, firewalls, and Distributed Denial of Service (DDoS) mitigation. We also offer managed compliance services for industry standards including HIPAA/HITRUST, HITECH, PCI DSS, and IRS-1075.

"Managed service providers have become integral to the success of businesses everywhere, both large and small," said Bob Skelley, CEO of The Channel Company. "Capable MSPs enable companies to take their cloud computing to the next level, streamline spending, effectively allocate limited resources and navigate the vast field of available technologies. The companies on CRN's 2018 MSP 500 list stand out for their innovative services, excellence in adapting to customers' changing needs and demonstrated ability to help businesses get the most out of their IT investments."

"We are thrilled to be recognized again by CRN as a leading MSP and to be featured on the Managed Security 100 list," said Jon Thomsen, Atmosera's Chief Executive Officer. "We are committed to always delivering better security and usability for all the environments we manage and to enable our customers to conduct business without having to worry about their underlying cloud and hosting infrastructure. We have made significant investments last year to keep up with escalating threats and exploits which translates to better peace of mind for our customers across North America and beyond."

The MSP500 list will be featured in the February 2018 issue of CRN and online at www.CRN.com/msp500.
