

PRESS RELEASE

## Component Control Announces New Software-as-a-Service for Parts Distributors and Logistics Operators

New service adds comprehensive capabilities to StockMarket.aero at an affordable price for small-to-medium sized parts dealers.

Las Vegas, NV - HAI HELI-EXPO - February 27, 2018 - <u>Component Control</u>, a CAMP Systems International Company, and leader in MRO and Logistics Software for the aviation market, announced today the Release of Quantum STEP (Q-STEP), a low cost service for Aviation Traders and Logistics Companies.

Quantum STEP (*Stock Trading Enterprise Platform*) extends the capabilities of StockMarket.aero's aviation parts marketplace to offer a comprehensive ERP service for traders. The service includes several features of Quantum's core aviation software that is in operation at some of the largest global Distributors and Logistics companies.

As a hosted, web-based, Software-as-a-Service model, Q-STEP supports the management of Inventory, Purchasing, Receiving, Vendors, Sales Orders, Invoices, and Repair. The service is directly integrated with StockMarket.aero for real-time inventory availability, as well as the ILS parts service. Additional premium features can also be added to include Lot Costing, Document Imaging and a Finance Bridge to Intuit QuickBooks.

"We developed this product to meet the needs of the small independent dealer," said Daniel Tautges, SVP Component Control. There was not a competitive product in the market that offered the feature rich capabilities of Q-STEP and we wanted to be able to offer products that customers could grow with (from small to large). With this product now, anyone, of any size, can use Quantum."

About Component Control
