CBCInnovis Announces Credit Integration with MortgageHippo

MortgageHippo digital mortgage solution now offering consumer credit from CBCInnovis

COLUMBUS, Ohio (February 28, 2018)— [CBCInnovis](#), a leading provider of mortgage credit and data validation services to the mortgage lending industry, announced today an integration of its credit data with [MortgageHippo®](#), providing a modern approach to the mortgage application process.

MortgageHippo offers lenders a customizable point-of-sale solution that allows borrowers to apply for a mortgage and complete the entire transaction in a modern online experience. Their digital mortgage platform delivers a complete borrower profile to the loan officer capable of being imported into an existing loan origination system (LOS). That profile includes the ability for applicants to authorize and request their credit at the Point-of-Sale.

“CBCInnovis is excited to announce our collaboration with MortgageHippo,” said Ken Viviano, senior vice president, CBCInnovis. “We strive to align ourselves with technologies that move the industry forward and this new integration is a step toward that important goal.”

The addition of CBCInnovis credit to the MortgageHippo platform will allow loan officers to maximize time and efficiency by receiving industry proven credit data within the borrower profile generated from MortgageHippo’s mobile-ready online application.

“We are proud to offer our clients an applicant credit profile they can trust from a reputable source,” said Michael Salichs, president, MortgageHippo. “Accurate data is a key component to providing today’s lenders with a viable, competitive digital strategy.”

About CBCInnovis

CBCInnovis offers a diverse portfolio of lending support solutions to the financial services industry. With tools designed to enhance efficiency and streamline processes, CBCInnovis solutions can assist with merged credit report services, identity, income and employment verification, fraud and risk mitigation, flood determinations, property appraisal and valuation, and closing services.
