Discovery

LEARNING PROGRAM

Discover Your Potential

Launching a career in tech can be rewarding, but it can be difficult to know where to start and how to prepare. LaunchCode is partnering with the St. Louis Public Library system to make the tools to get started accessible to the entire community.

Our new Discovery learning program introduces skills essential for success in programming and gets you on the right path to pursue your own career in tech. The free, self-paced curriculum is designed to be completed over one to two months, and is available on computers at all St. Louis Public Library locations and online.

Get Started Learning

- What is Coding?
- Effective Study Practices
- Computer Fundamentals
- Coding Basics
- Problem Solving
- Essential Math

LaunchCode's Discovery Program pilot is made possible all over St. Louis through our partnership with the St. Louis Public Library, and with funding from Facebook's Community Boost initiative.
