POVERTY UPDATE FINDS MILLIONS OF ILLINOISANS LIVE IN OR NEAR POVERTY, WITH WOMEN DISPARATELY IMPACTED

CHICAGO – April 19, 2018 – Heartland Alliance’s [Illinois Poverty Update](#) indicates that millions of people in Illinois are experiencing poverty or are on the cusp. Rooted in inequity, poverty prevents people from meeting basic needs, improving their quality of life, and creates barriers to opportunities including quality education, stable employment, affordable housing and safe neighborhoods.

The update sheds light on who is most likely to experience poverty in Illinois: Women, people of color, and children have the highest poverty rates.

“It’s clear that discriminatory practices, policies, and social structures contribute to highly disparate poverty rates for women—especially when they are members of other historically oppressed groups, such as people of color, trans people, and people with disabilities,” says Katie Buitrago, Director of Research at Heartland Alliance. “We must dismantle policies that perpetuate gender and race poverty disparities.”

The poverty update also found that:

- **Almost one-third of Illinoisans are poor or low income.**
- **Women’s poverty rates are over 20 percent higher than men’s.**
- **Certain gender and racial groups are much more likely to experience poverty than others: black women experience poverty at a rate 3.5 times higher than white men, while black men’s poverty rate is 3.2 times higher and Latina women’s is 2.5 times higher than white men.**
- **Poverty remains higher than prerecession levels, which means that Illinois is doing worse than the national average at recovering from recession-era losses.**
- **Poverty continues to grow in the Chicago suburbs, as it has over the past few decades.**

“A strong anti-poverty strategy is threefold: ensures people can meet their basic needs, moves people out of poverty by expanding opportunities, and keeps people out of poverty through equitable policies. There are solutions being debated in the Illinois General Assembly this year that could make important inroads in reducing poverty in Illinois,” according to Sam Tuttle, Heartland Alliance’s Director of Policy.

In addition to the Illinois Poverty Update, Heartland Alliance also released [state legislative district poverty fact sheets](#). These releases are the first of a series Heartland Alliance is publishing on poverty in Illinois this year. Local- and county-level data books will be published this summer, and an in-depth exploration of the forces that contribute to gender-based poverty inequity will be released in the fall. For more information, [sign up](#) for our mailing list.

The poverty update and legislative district fact sheets are available at <https://www.heartlandalliance.org/research/>. All data images are to be credited to The Social IMPACT Research Center. Contact IMPACT for assistance accessing and interpreting data.

###

Heartland Alliance, one of the world's leading anti-poverty organizations, works in communities in the U.S. and abroad to serve those who are experiencing homelessness, living in poverty, or seeking safety. It provides a comprehensive array of services in the areas of health, housing, jobs and justice—and leads state and national policy efforts, which target lasting change for individuals and society.

Heartland Alliance's Social IMPACT Research Center conducts research that helps leaders create change and advance real-world solutions to poverty. Follow IMPACT on twitter at twitter.com/impactheartland. For more info, visit www.heartlandalliance.org/research/

ILLINOIS POVERTY UPDATE

Millions of people in Illinois experience poverty or are living on the brink. That societal position keeps opportunities out of their reach and nearly guarantees worse outcomes in every quality of life domain—making ALL of us worse off.

- Almost **one-third of Illinoisans are poor or low income.**
- **Poverty remains higher than pre-recession levels**—which means that Illinois is doing worse than the national average at recovering from recession-era losses.
- **Poverty continues to grow in the Chicago suburbs**, as it has over the past few decades.
- **Children, women, and people of color** have the highest poverty rates.
- **Women's poverty rates** are over 20 percent higher than men's.
- **Certain gender and racial groups are much more likely to experience poverty than others:** black women experience poverty at a rate 3.5 times higher than white men, while black men's poverty rate is 3.2 times higher and Latina women's is 2.5 times higher than white men.

Discriminatory practices, policies, and social structures contribute to highly disparate poverty rates for women—especially when they are members of other historically oppressed groups, such as people of color, trans people, and people with disabilities. These persistent disparities by gender and race demand that we dismantle policies that perpetuate them.

Watch for an in-depth exploration later this year of the forces that contribute to gender-based poverty disparities. [Sign up](#) for our mailing list.
