

Tenable and Siemplify

Identify, triage and remediate security vulnerabilities quickly and easily

Solution

The Siemplify integration with Tenable SecurityCenter® offers security operations teams the ability to orchestrate, standardize and automate vulnerability processes from a single intuitive workbench to improve overall SOC efficiency and speed incident response. Together, Tenable and Siemplify give security analysts a unified platform for gaining the deep insight needed to investigate, triage and remediate vulnerabilities and cyberthreats.

Value

The Siemplify integration with Tenable SecurityCenter provides:

- Automatic unification of vulnerability context with other data sources
- Contextualization of vulnerabilities for more informed decision making
- Deeper understanding of relationships between various entities and artifacts within the security ecosystem
- Prioritization of the most critical vulnerabilities and alerts
- Creation of playbooks to standardize vulnerability management and automate response to known vulnerabilities

Features

With this integration, you can:

- Schedule complete vulnerability scans
- Kick-off remediation scans
- Retrieve asset information
- Retrieve vulnerability information for an asset
- Create cases from vulnerabilities

Technology Components:

- Tenable SecurityCenter 5.3 or higher
- Siemplify Security Orchestration and Automation Platform

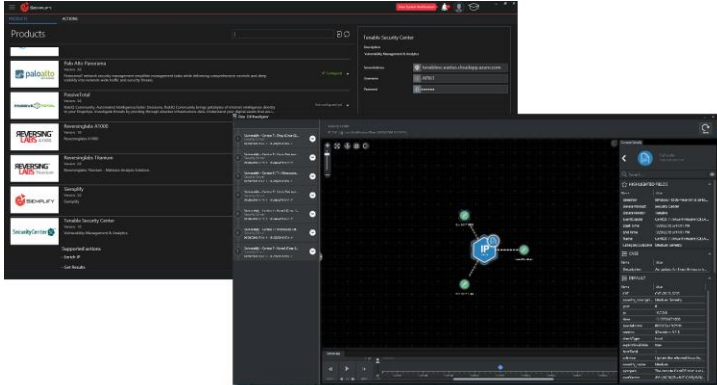

Solution Benefits:

- **Unified** view of disparate data sources
- **Enhanced** prioritization of the most important vulnerabilities
- **Repeatable** vulnerability remediation processes

How It Works

All functionality between Tenable SecurityCenter and Siemplify is done using REST API calls from Siemplify.

The Siemplify Security Orchestration and Automation workbench enables analysts to configure and contextualize vulnerabilities from Tenable SecurityCenter and orchestrate vulnerability management processes.

More Info

The integration is available for download and install through the Siemplify Marketplace. Simply go to the Marketplace tab, locate the SecurityCenter integration and press Install. Once the installation is complete, go to the Integrations tab, locate the SecurityCenter integration, and simply fill in the required credentials to begin utilizing the full range of capabilities.

For assistance with the integration, please contact support@siemplify.co

About Siemplify

Siemplify provides a holistic security operations platform that empowers security analysts to work smarter and respond faster. Siemplify uniquely combines security orchestration and automation with patented contextual investigation and case management to deliver intuitive, consistent and measurable security operations processes. Leading enterprises and MSSPs leverage Siemplify as their SOC workbench, tripling analyst productivity by automating repetitive tasks and bringing together disparate security technologies. Founded by Israeli Defense Forces security operations experts, Siemplify is headquartered in New York with offices in Tel Aviv. Learn more at siemplify.co

About Tenable

Tenable™, Inc. is the Cyber Exposure company. Over 24,000 organizations around the globe rely on Tenable to understand and reduce cyber risk. As the creator of Nessus®, Tenable extended its expertise in vulnerabilities to deliver Tenable.io, the world's first platform to see and secure any digital asset on any computing platform. Tenable customers include more than 50 percent of the Fortune 500, more than 20 percent of the Global 2000 and large government agencies. Learn more at tenable.com
