

If vision loss affects your ability to complete day-to-day tasks, it is time to consider what assistive technology can do for you.

Our team of specialists includes a Teacher of the Visually Impaired and staff who are visually impaired who understand your diagnosis and unique needs as an individual living with vision loss. With our combined knowledge and expertise in technology, we can help you identify the appropriate products to meet your specific needs. Our specialized approach starts with a one-on-one conversation to help us understand what is important to you. Then we'll discuss and demonstrate products that can help improve your quality of life and maximize your independence at home, in your community, at work and at school.

Florida Vision Technology carries products from multiple companies which increase the choices you have for finding solutions to meet your individual needs. Our service includes in-home or on-site set-up and a training session to ensure you are confident using the technology you choose.
