MAKE PEN TESTING NOT SUCK

Explore the benefits of using a Pen Testing as a Service approach

Cobalt's Pen Testing as a Service (PTaaS) Platform transforms traditional pen testing into a data-driven vulnerability management engine. Fueled by a global talent pool of certified freelancers, our modern pen testing platform delivers actionable results that empowers agile teams to pinpoint, track, and remediate vulnerabilites.

- Dynamic Reporting
- Selectively-Sourced Talent
- Efficient Workflows
- Creative Results
- Collaborative Team Approach

62% fewer overhead hours to manage

96% higher Return on Investment

78% reductions in triage time compared to traditional pen tests

Companies that use Cobalt: algolia **GoDaddy** MuleSoft

"[Cobalt's pen testers] have re-energized my faith in third party pen testing as something that is not just a check the box thing, but actually leaves me sleeping a little better at night."

- Chris Haag, Senior Director of Engineering at Agari
