BotanaSolv™200

Ultra Pure has been working hard to offer a new extraction solvent alternative.

Our team has just launched **BotanaSolv™200**, a blend of 200-proof grain alcohol with 5% high purity n-heptane. These ingredients have been safely used for many years for botanical extraction and edible oil recovery. Using the **BotanaSolv™200** blend does not require a special permit to ship and is Federal Excise Tax free.

Marketing Information

Starting Product

- 200 Proof USP Grade Alcohol

Process

- Using the highest quality 200 Proof USP Grade Alcohol, we then blend it with the 5% High Purity n-Heptane

Benefits

- Lower cost highest purity botanical extraction solvent alternative
- No permits are required to purchase
- Not subject to the Federal Excise Tax
- Same performance as pure alcohol for most applications
- Thousands of dollars of savings per containers versus purchasing pure ethanol

Disclaimer

- Heptane has a higher boiling point than ethanol, which may result in higher energy costs.
- Residual solvent testing must be conducted on finished product.
- Consult with your equipment supplier to ensure a quality extraction will be reached without much change to your processes.

Product Specification and Availability

- The BotanaSolv™200 offering is available in drum, tote and bulk tanker quantities in North America from Ultra Pure LLC.
- Packaged product is available to ship next business day from our St. Louis, MO facility.
- Lead time to your facility, at most, should be 5 business days depending on your location.
- CoA provided with every delivery.
